Read the story below and use it to answer questions 26 to 37.

Dogs often become really close family members. A dog is the cleverest pet you can own. Dogs can be easily trained to do **many** things. They can look after cattle and sheep. They can chase away thieves and even guide blind people.

There are more than one hundred types of dogs. Dogs can be big or small. They also have different colours and shapes. Bigger dogs need more space than smaller dogs.

Dogs need a lot of care. You need to spend time with your dog everyday. Dogs need good food to keep them strong, fit and healthy. A dog that is strong and fit is a good hunter. It can catch birds and small animals like hares. It can even run after thieves. Walking a dog gives it good exercise.

It can be very expensive to look after a dog. Dogs need to be given good food such as meat mixed with dog biscuits, bread and some cooked vegetables. These can cost a lot of money. Also, the puppies or young dogs need to eat about four times everyday. Big dogs can eat just once in a day.

Every dog needs **basic** training so it may be easy for it to live with its owner. A dog should walk just behind its owner. It should sit when it is told to do so. It should also come to the owner when it is called.

Dogs **protect** people but they also need them as their friends. So, someone with a dog should make sure a dog is not left alone.

26. How can you tell that dogs are cleverer than any other pet that a person can have?
