AGRICULTURE STD 5 – TERM 2 - 2018

INSTRUCTIONS **DURATION : 60 Minutes**

1) Answer all questions on the question sheet provided.
2) When you are told to begin, work as fast and accurately as you can. If you cannot answer a question, do not spend too much time on it, go to the next question and come back to it later.
3) Write your answers on the lines or spaces provided.
4) After you have finished, cross-check your answers.

END OF TERM 2 2018 STANDARD 5 AGRICULTURE

NAME: _____ Class: _____

1. What is Agriculture?

   _____

   _____ (1)

2. List two (2) Branches of Agriculture.

   a) _____

   b) _____ (2)

3. Which career in Agriculture deals with the teaching and showing people better ways of raising crops?

   _____ (1)

4. What is likely to happen when farm workers are infected by HIV/AIDS?

   _____

   _____ (1)

5. State one positive effect of biotechnology.

   _____ (1)

6. List two importance of Agriculture.

   a) _____

   b) _____ (2)

7. Define germination.

   _____

   _____ (1)

8. Mr Mbere owns a big farm in Moshopha. He deals with the growing of field crops only.

   a) Which branch of Agriculture is practiced by Mr Mbere?

      _____ (1)

   b) Give one problem that Mr Mbere might face as a farmer.

      _____ (1)

   c) State one possible solution to a problem mentioned above.

      _____ (1)

9. Use the diagram below to answer the following questions.

a) What is soil constituent **X**?

_____ (1)

b) Which soil constituent takes the smallest percentage?

_____ (1)

10. The problem of low rainfall can be solved by

_____ (1)

11. Define arable farming.

_____ (1)

12. Write two requirements needed for plant growth.

a) _____

b) _____ (2)

13. What is soil fertility?

_____

_____ (1)

14. Describe one way of increasing soil fertility.

_____

(1)

15. What are the two benefits of using organic fertilizers?

a) _____

b) _____ (2)

16. State the farm tool used for transplanting seedlings.

_____ (1)

Use the diagram below to answer the following questions.

17.

a) Name the farm implement shown above.

_____ (1)

b) State the use of the farm implement named above.

_____ (1)

c) What is the two proper ways of caring fro the farm implement above?

i. _____

ii. _____ (2)

d) What problem can be caused by the implement above?

_____ (1)

18. Differentiate between organic and inorganic fertilizers.

_____

_____

_____ (2)

19. Write examples of the following fertilizers.

Organic Fertilizers	**Inorganic fertilizers**
a.	c.
b.	d.

(4 marks)

20. Name the tool suitable for pruning.

_____ (1)

21. State two importance of soil.

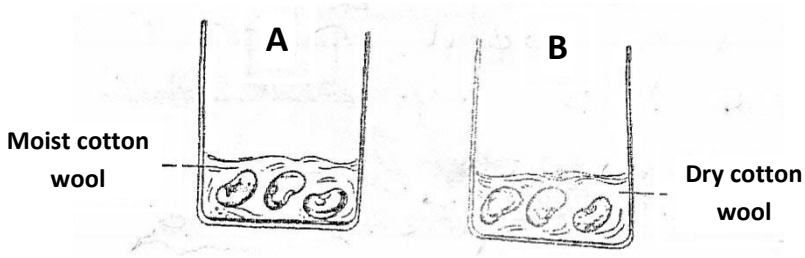

a) _____

b) _____ (2)

22. Neo put some soil in a glass container. She poured water and bubbles appeared. Which soil constituent was Neo investigating?

_____ (1)

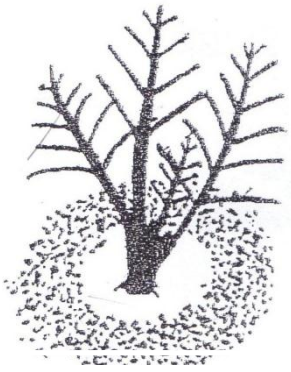

Study the diagram below and answer question 23.

23. In which beaker will germination take place?

_____ (1

Use the picture below to answer question 24.

Spread the fertilizer around the tree at a distance of about 1 metre

24. State the method of fertilizer application above.

_____ (1)

End of Term II 2018

Agriculture 5

1. Agriculture is the growing of crops and rearing of animals useful to us
2. Branches of agriculture: Horticulture, Agronomy, Soil science, Agricultural engineering, etc.
3. Agriculture demonstrator
4. –they neglect their work because they have to go to the clinics more often
   -more money is used on ARVs than improving farms
   -as more farmers die, there will be less production
5. –more food is produced
   -crops that can grow well are developed
   -it is used to breed animals that are resistant to diseases
6. –sources of food
   -source of income as we sell products
   -source of employment e.g: herders, farm workers, tractor drivers
7. It is when the embryo in a seed develops into a new plant
8. a) Arable farming
   b) low and unreliable rainfall, poor soil, outbreak of pest
   c)low and unreliable rainfall- build dams/ use mulch to help keep water in soil
   Poor soils- add manure/ practice crop rotation
   Outbreak of pest- use pesticides
9. a) X- inorganic matter/mineral matter
   b) organic matter
10. Building dams/ grow crops that are resistant do drought/build boreholes
11. Arable farming is growing crops only using seasonal rainfall
12. Water/ suitable temperature/air/sunlight/absence of harmful substances
13. The ability of the soil to give plants enough food so that they can grow well
14. Adding manure or fertilisers/ inter-cropping/ crop rotation/ ploughing remains back to the soil after harvesting
15. – they are cheaper than inorganic fertilizers/ they are found locally/ give the soil dark rich colour/ they contain a variety of plant nutrients

16. Trowel
17. a) Disc harrow

    b) used to level the soil/to break up lumps in the soil/ to remove weeds/ to cover newly planted seeds

    c) remove dust/oil moving parts/tighten loose nuts and bolts/ store in a covered shelter

    d) damage the soil/ destroy animals leaving under the soil/ damage plants/ spread weeds and diseases
18. Organic fertilisers are fertilisers made from rotten plants and animals and their products while inorganic ferterlisers are made people in factories.
19.

Organic Fertilizers	**Inorganic fertilizers**
a. Kraal manure/ Chicken manure	c. Superphosphate/ Urea
b. Compost/ green manure	d. 2:3:2/ LAN

20. Secateurs/ pruning shears
21. For growing crops/for building houses
22. Air
23. Beaker A
24. Ring application
