PSLE 2023 AGRIC MARKING SCHEME

SECTION A

Item	Response	Marks
1 a) b)	Digging fork/garden fork -for cultivating -tilling -turning the soil -loosen the soil -for digging	1 mark 1 mark
2.	-they are expensive -they require skilled manpower -they do not improve the soil structure/water holding capacity and aeration	1 mark each for any two points
3.	-sour milk -traditional beer -soft porridge	1 mark each for any two points
4.	-ear tagging -ear notching/marking	1 mark for each point
5.	- karakul -merino -blackheaded persian -tswana -dorper -the damara -the ronderib -the Leicester -Swakara -Elde France	1 mark each for any 2 breeds given
6.	-Botswana Meat Commission (BMC) -Individuals -cooperatives	2 marks
7.	The dry leaves will decompose and release nutrients for the plants that will be grown	2 marks
8.	-water controls animals' body temperature/temperature regulation -water helps in the digestion of food -water forms part of body cells and tissues -water transports dissolved food and minerals to all parts of the animal's body/helps in the circulatory system	2 marks
9.	R – Agronomy S - Horticulture	1 mark each for any two points

10. a)	**Agents of Soil Erosion**- they are things that do the actual carrying of the soil from one place to another.	1 mark
b)	**Causes of Soil erosion** – they are factors that help or influences the carrying of the soil from one place to another.	1 mark
11. a)	U – inorganic matter/mineral matter T – Organic matter/humus	2 marks
b)	-it transports nutrients to all parts of the plant -it keeps the plant hydrated -it is used by the plant during photosynthesis	2 marks
c)	25%	1 mark
12.(a)	-Hoof Trimming	1 mark
(b)	-it prevent diseases which may be causes by parasites on the overgrown hooves -the goat will be able to move freely/travel a longer distance in search of food -it reduces lameness from the goats.	1 mark each for any two points
(c)	- hoof trimmer -knife	2 marks

13.(a)	Disease Control fence/cordon fence	2 marks
(b)	- Foot and mouth -Contagious Bovine Pieuro Pneumonia (CBPP) -Coccidiosis -measles	2 marks
(c)	-To separate wild animals from domesticated animals	1 mark
(d)	-The Ministry of Agriculture	1 mark
14.(a)	-Thinning	1 mark
(b)	-competition for sunlight, water, air and sunlight on plants is avoided -yield can improve -movement between the plants will be easy -weeding will be easy -transmission of pests and diseases from one plant to another is reduced	3 marks
(c)	-Broadcasting	1 mark
15.(a)	-Commercial	1 mark

(b)	-Botlhe is selling to local shops -method of irrigation/watering is for large scale farmers	2 marks
c)	-lending them money to increase their production -workshopping them to upgrade their farming skills and knowledge -helping them with marketing strategies like advertising	1 mark
(d)	-Pastoral farming/stock farming -Mixed farming	1 mark
16.(a)	• Biological weathering	1 mark
(b)	• As animals move from place to place, they trample on some rocks. As they move they break down some bigger rocks to form soil. Plant roots also develop in between cracks on the rocks. By so doing they cause the rocks to break and form the soil. Animals living in the soil and other burrowing animals breakdown some rocks to form soil as they dig the soil	3 marks
(c)	• Physical weathering • Chemical weathering	1 mark
17.(a)	• Mulching	1 mark
b)	• As soon as seedlings emerges from the soil/as soon as seedlings grow out of the soil.	1 mark
(c)	• So that plants receive sunlight which needed for growth • The mulch may attract pests • So that weeds can be spotted/seen well in time and be removed	3 marks
18.(a)	• W- vegetables are harvested from the plots • X – the vegetables are boiled/cooked • Y – the vegetables are dried using the sun	3 marks
(b)	• To remove moisture from the vegetables so that they kept longer. • To prevent the vegetables from rotting/going bad	1 marks
(c)	• Morogo wa dinawa (Bean leaves) • Pumpkin leaves • Okra (delele) • Amarathus (Thepe) • Water lily (tswii) • Monyaku	1 mark
