FILLING IN THE BLANKS

Agriculture is a broad field with many subfields called branches. Fill in the missing five branches of agriculture on the diagram below.

MATCHING QUESTIONS

A tool should always be used for the purpose for which is meant. Look at the list of garden tools and their uses below. Match the tools in the left hand column with their uses in the right hand column. Note that some tools may have same use.

List of garden tools	Uses of garden tools
a. Bucket	1) cultivating the soil
a. Digging fork	2) cutting unwanted branches
a. Hand fork	3) driving pegs into the ground
a. Hoe	4) fetching water
a. Hosepipe with sprinkler	5) leveling the soil
a. Machete	6) loading or unloading the soil
a. Mallet	7) loosening the top soil
a. Pegs	8) making shallow trenches
a. Pick	9) marking out a vegetable plot
a. Pick-axe (mattock)	10) measuring plots
a. Rake	11) pruning small and buds
a. Secateurs	12) removing tree stumps
a. Shears	13) removing weeds
a. Shovel	14) straightening plot edges
a. Spade	15) transplanting seedlings

a. Tape measure and string	16) transporting materials
a. Trowel	17) turning or digging over the soil
a. Watering can with rose	18) watering plants
a. Wheel barrow	19) watering seedlings

COMPLETING TABLES

Complete the table on branches of agriculture.

Career in Agriculture	**Description**
a)	Deals with the growing of fruits trees, flowers and vegetables
Animal husbandry	b)
Forestry	c)
d)	Deals with the machines, implements and buildings used on a farm
Economics	e)
Soil science	f)
g)	Deals with the growing of field crops

Circle the correct answer

1. What do we call the growing of crops and rearing of livestock?

b. Forestry b) Agriculture c) Soil Science d) Horticulture

1. Which of the following is a career in agriculture?

Working as a/an :

a. Agriculture teacher b) Choirmaster c) Carpenter d) Social worker

   a) Hot, dry climate b) Growing crops c) Cheap pesticides d) fertile soils

FILLING IN THE BLANKS

1. Choose the correct word in the brackets ( ) to complete the sentences:
b. Soil structure can be improved by adding _____ to the soil.

(**organic fertilisers, inorganic fertilisers**)

a. Soils are grouped into clay, sandy and loam according to their_____.

(**structure, texture, fertility**)

a. Rock particles of different sizes are called_____.

(**soil structure, soil separates, soil texture**)

a. Things that make up the soil are called _____.

(**soil constituents, soil texture, soil structure, soil parts**)

a. Dead plants and animal remains that are rotten are called_____.

(**mineral matter, humus, kraal manure, fertiliser**)

a. The other name for inorganic fertiliser is _____.

(**chemical fertilizer, 2:3:2 (22) , compound fertilisers**)

COMPLETING TABLES

State the meaning of the listed terms and give at least three examples of each.

Term	Meaning	Examples
1. Agents of weathering		
1. Causes of soil erosion		
1. Agents of soil erosion		

SHORT ANSWER QUESTIONS

Answer the following questions

1. State the difference germination and seedling emergence.

_____
_____
_____

1. What do seeds need to germinate?

_____
_____
_____

1. Write down the requirements for plant growth.

_____
_____
_____

1. Describe the direct and indirect methods of planting vegetables.

_____
_____
_____

1. Explain why seeds cannot germinate when there is too much water in the soil.

_____
_____
_____

1. What are the following nutrients used for in plants?

Nitrogen_____
_____
_____

Phosphorus_____
_____
_____

Potasium_____
_____
_____

1. Write down any five factors to consider when choosing a vegetable garden site.

_____

True or false statements

Indicate whether the following statements are true or false by writing T if the statement is true and F if the statement is false.

1. Plants absorb water through their leaves._____
2. Plants get minerals or nutrients from the soil._____

5. Weeds compete with the fruit trees for _____.
6. Use the words in the box to complete the supply chain of the fruits

_____, _____,_____,_____

Consumers	fruit growers	greengrocer	produce market

Matching questions

1. Rearrange the following examples of vegetables found in Botswana into a flow chart by matching them with the correct heading.

Delele tomatoes maize potatoes cabbages spinach monyaku morogo wa dinawa Thepe beetroot peas tswii rape beans serepe rothwe leshwe

1. Some plants can be used to chase away pests in the vegetable garden. Some of these plants are listed in the table below. Match each plant with the pests it repels.

Repellent plant	**Pests it repels**
Marigold	Butterflies
Mint	Ants
Garlic	Nematodes

Essay questions

Answer the following questions in essay in your workbook.

1. Describe exotic and indigenous vegetables and give the advantages and disadvantages of each group.
2. Write a paragraph to describe why vegetables and fruits are important to people living with HIV and AIDS.
3. Discuss mulching under the following headings.

d. Reasons for mulching
e. Materials used

f. Advantages and disadvantsges
7. Discuss advantages and disadvantages of exotic and indigenous fruits separately.

Multiple choose

1. What do we call a plant grows where it is not wanted?
b. Crop
c. Pest
d. Weed
e. Vegetable

1. Which one is not a type of vegetable plot?
b. Sunken plot
c. Ridged plot
d. Flat plot
e. Raised plot

1. A_____ plot is suitable for areas with high rainfall.
b. Sunken
c. Raised
d. Level
e. Nursery

1. Which one is an advantage of digging the soil when making a plot?
b. The soil end up becoming hard
c. Water will penetrate with difficulty
d. The soil will become waterlogged
e. Plant roots will penetrate easily

1. Why should there be pathways in between vegetable plots in the garden?
b. To beautify the garden
c. To allow access to and movement around plots
d. To prevent soil erosion in the garden
e. To mark boundaries of plot

1. What is a disadvantage of mulch?
b. It controls weeds
c. It attracts pests
d. It prevents evaporation
e. It reduces soil erosion

1. How are weeds harmful to crops?
b. Some add nutrients to the soil
c. Some fertilise the soil
d. They compete with crops for food
e. They are difficult to control

1. Which one is not a reason for prunnig plants?
b. To cool the plants through transpiration
c. To increase the crop quality and yield
d. To remove unproductive parts
e. To control pests and diseases

1. What do we call an organism that damages crops?
b. Disease
c. Insect
d. Pest
e. Predator

1. Which activity is not part of preparing vegetables for marketing?
b. Cleaning
c. Sorting
d. Weighing
e. Staking

Complete the table below by filling in four breeds for each of the farm animals listed.

Animals	**Breeds**
Beef cattle	_____,_____,_____,_____
Dairy cattle	_____,_____,_____,_____
Layers	_____,_____,_____,_____
Broilers	_____,_____,_____,_____
Goats	_____,_____,_____,_____
Sheep	_____,_____,_____,_____

Separate the following examples of poultry parasites into internal and external parasites.

Lice tapeworms fleas roundworms mites faecal worms tampans gape worms thread worms

_____
_____
_____
_____

Vegetables found in Botswana

Indigenous vegetablesExotic vegetables
