AGRICULTURE

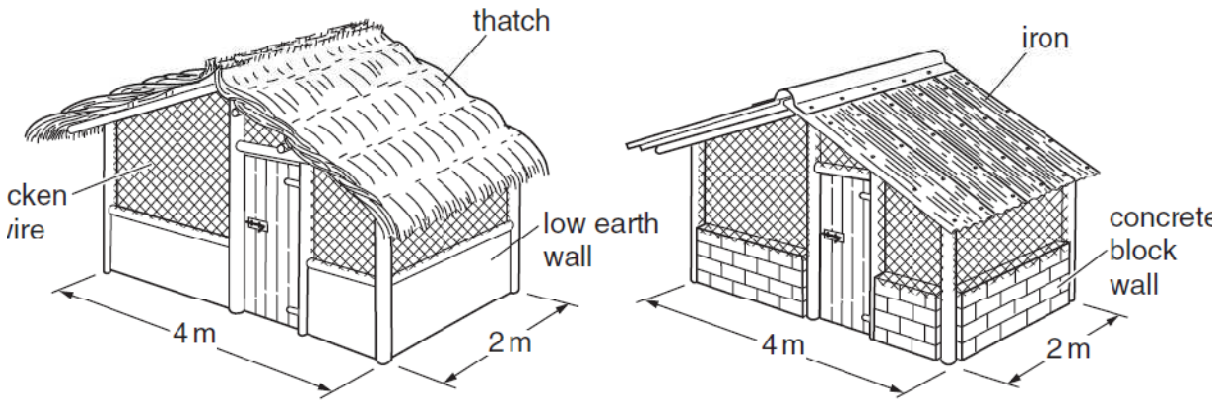

1. Explain why seeds germinate better in a soil that has a good crumb structure.
   ……
2. State two advantages of rotating crops.
   ……..
3. How would the farmer produce 'organic' crops in the plot?
   ……
4. Explain why the rows of crops on a slope are planted across the slope of the land.
   .....

The table below gives details of three chemical insecticides, **A**, **B and C**. Use it to answer questions that follow

Insecticide	Method of application	Mode of action
A	Spray	kills insects on contact
B	Bait	kills insects when eaten
C	Vapour	Repels insects

(i) For **two** of these insecticides suggest a disadvantage that could result from their use.
insecticide .....
disadvantage .....
.....
insecticide .....
disadvantage .....
.....2]
(ii) List **three** precautions that should be taken by the operator when spraying an insecticide.
.....
.....
.....3]
(iii) State two reasons for using biological control rather than the methods in the table above.
1. .....
.....
2. .....
.....2]

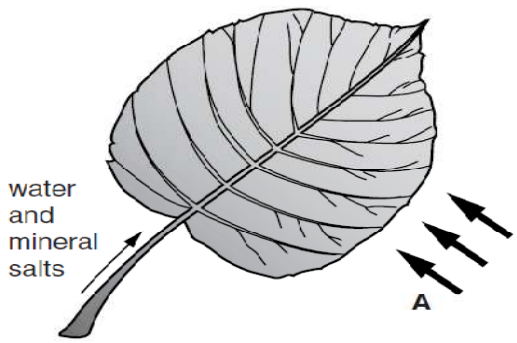

The diagram below shows two chicken houses. Use it to answer questions that follow

State **one** advantage of

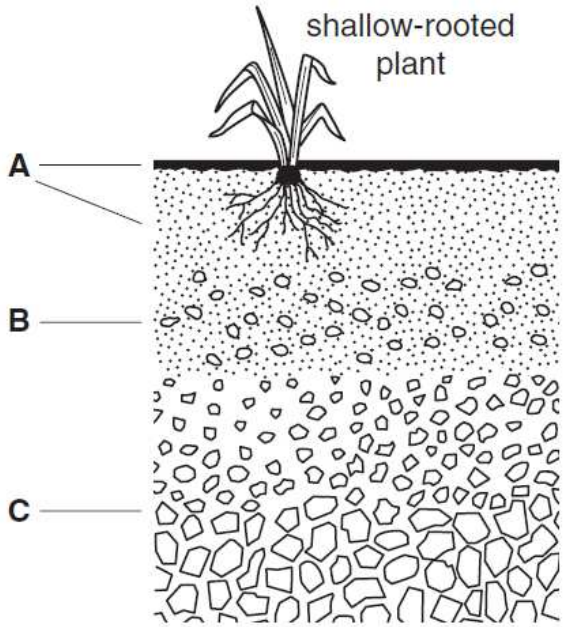

(i) the thatched roof;
.....1]
(ii) the iron roof.
.....1]
(iii) State two reasons for constructing an over-hanging roof on a livestock house.
1. .....
.....
2. .....
.....2]
(iv) Which material, earth or concrete blocks, would be more suitable for the wall of a chicken house?
.....
Give a reason for your answer.
.....
.....1]

Use the diagram below to answer question.

Name the gas **A** used by the leaf in photosynthesis.....[1

Use the figure below of soil profile to answer questions

(i) Name layer **B**. .....[1]

(ii) Explain how the layer **C** could be broken up by

(a) the action of plants; .....
.....

(b) the action of chemicals from the atmosphere. .....
.....
.....3]

Name two hand tools that can be used for turning over the soil.
..... *and* .....[2]

State **one** safety precaution to be observed when using hand tools in the garden plot.
.....
.....1]

(iii) State two reasons for turning over the soil.
1. .....
2. .....[2]

List three things to consider when deciding where to make a garden plot.
1. .....
2. .....
3. .....[3]

Name a cereal crop. .....

Complete the table below showing list of food groups and their use in animals

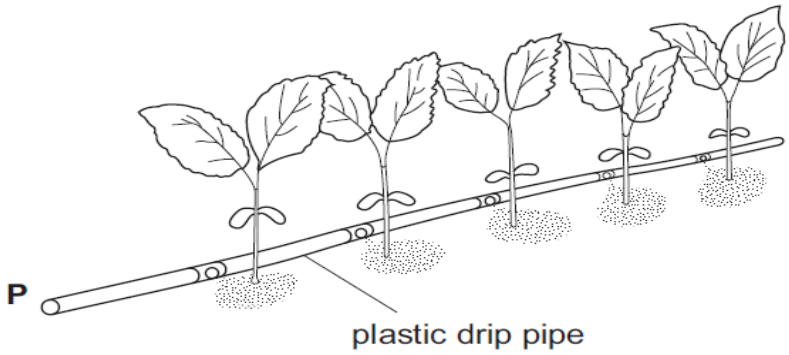

food group	use in the animal
carbohydrate	energy production
protein	.....
.....	energy storage
vitamins	health
minerals	health

The diagram below shows a method of farming used by Ms Skhonkhwana. Use it to answer question

Name the method of land use suggested by this diagram

What is the name of irrigation shown by the diagram below?

Suggest two advantages that drip irrigation has over furrow irrigation

---

List two products, other than meat, that are provided by chickens

1…….. 2……..

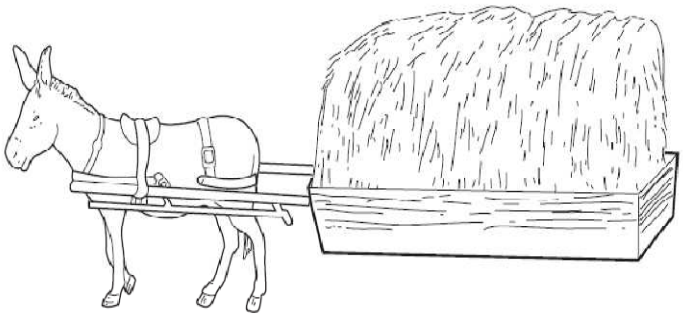

What is meant by shifting cultivation?

Which system of farming is shown by the diagram below?

Name an example of biological pest control.

Which environmental problem is likely to be caused by the mode of transport shown in the diagram below?

Use the diagram below to answer question

State two reasons why the worker is at risk.

1……

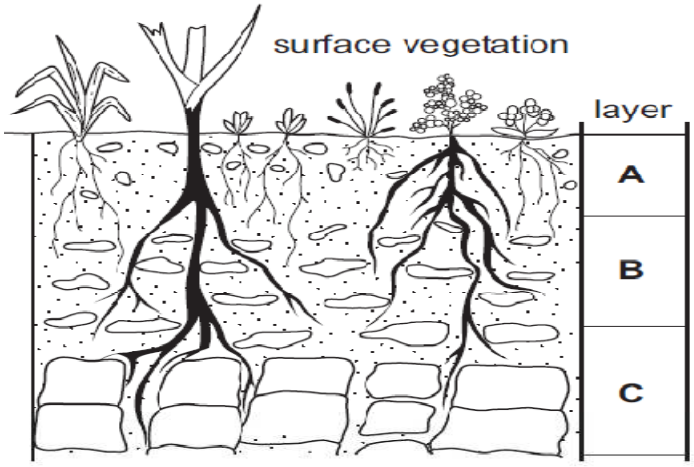

2……

Complete the table below to show uses of animals

Place ticks to indicate the main uses of animals listed below. Use only **six** ticks

Animal	Meat	Milk	Skins	Transport
Ostrich				
Rabbit				
Goat				

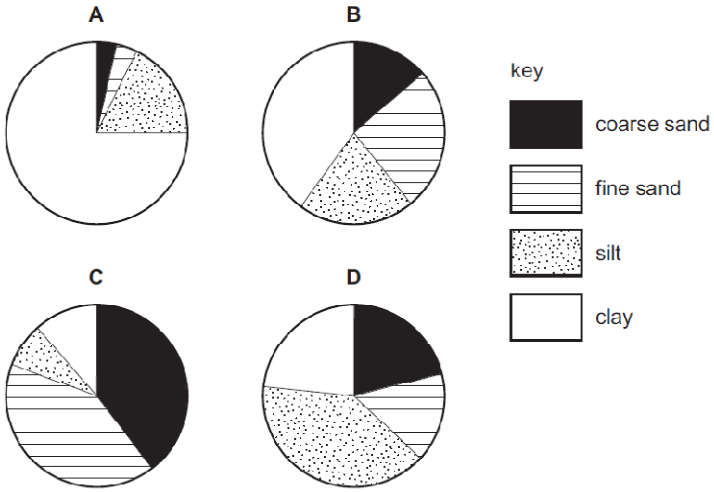

Use the diagram below to answer question

Name layer C.

In which layer would most living organisms be found?

The pie charts that represent the composition of four soils, A, B, C and D.

Which soil would not drain well?

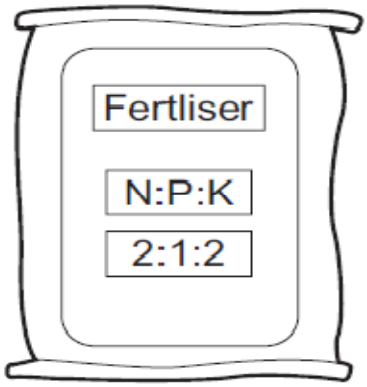

Give a reason for your answer.

Fertilizers provide cereals with nutrients.
State two disadvantages of using organic fertilizers, such as (Kraal manure).

1……
……

2……
……..

The diagram below shows a bag of inorganic fertilizer

What does K stand for?

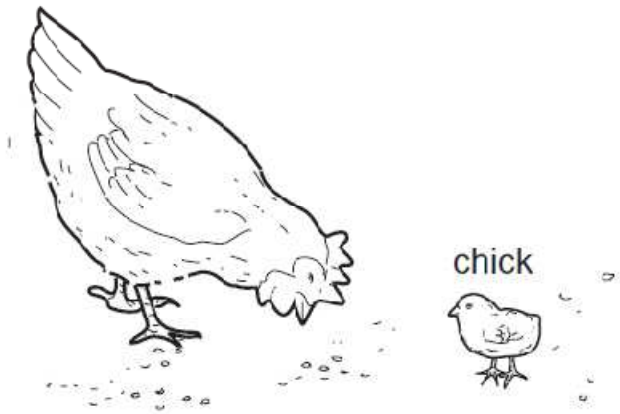

……

Cereals are often grown in rotation with legumes such as cow peas and ground nuts.

Describe what is meant by rotation.

…….....
.....

The diagram below shows a broiler chicken and a broiler chick. Use it to answer questions

Broilers take 52 days to grow ready for market.

This rapid growth will not be achieved if the chicks become ill.

Give two signs which indicate that a chick is ill.

1. …….

2. …….

State what action should be taken by the farmer if a chick becomes ill.

……
……

Use the diagram below to answer questions that follow

The cow provides the farmer's family with milk. The milk can be used to make butter and cheese.
Give **three** other products the cow provides and state what each can be used for.

……
……
……

State **two** ways to recognize ill health in a cow.

1 .....
.....
2 .....
..... [2]

The land created from the forest would be liable to erosion.

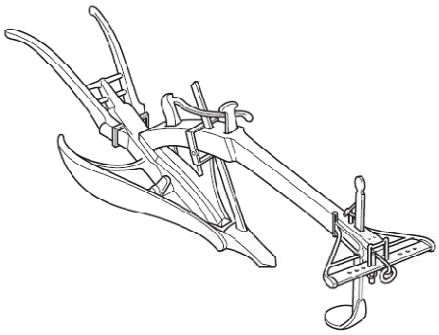

(i) State **two** ways soil erosion might occur.

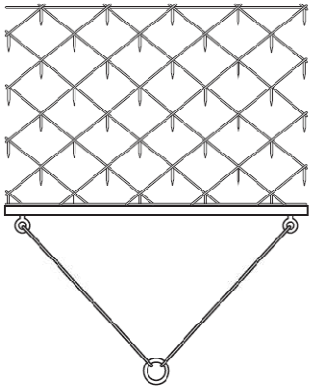

1 .....
.....
2 .....
..... [2]

(ii) State **two** ways this soil erosion could be reduced.

1 .....
.....
2 .....
..... [2]

Below are the two farm Implements that are used to cultivate the soil. Use them to answer questions that follow.

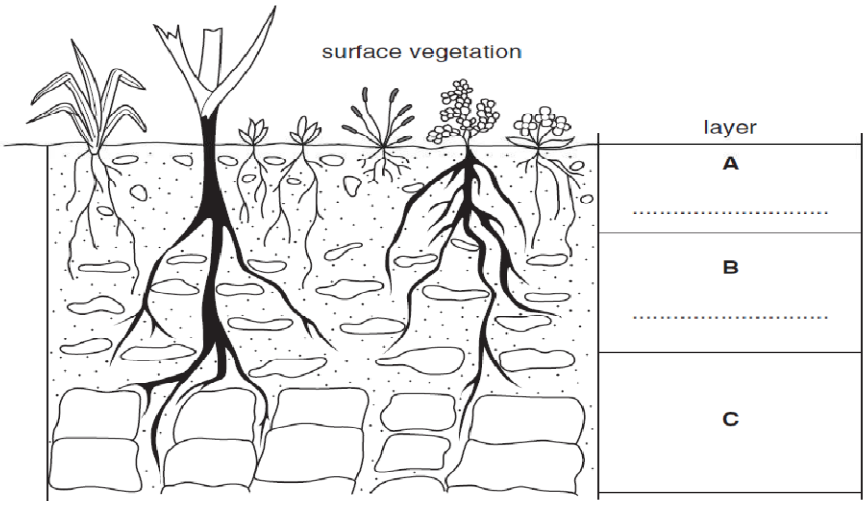

Name **two** tools that you could use in the garden that would do the same job when preparing a seed bed.
.....
.....

Explain how each tool you mention could be used to prepare a seed bed in the garden.
.....
.....
.....
.....
..... [2]

Below is a diagram showing soil profile. Use it to answer questions that follow

(i) Label the parts **A** and **B** on the soil profile. [2]

(ii) In which layer, **A**, **B**, or **C**, would you expect to find most organic matter?
..... [1]
(iii) Which layer would you expect to have the highest temperature in the early morning?
.....
Give a reason for your answer.
.....
..... [2]

Describe how rivers cause the physical weathering of rocks.
.....
.....
.....
.....[2]

Explain how rain causes the chemical weathering of rocks.
.....
.....
.....
.....[2]

State two advantages of using cattle manure rather than chemical fertilizers.
1. .....
2. ..... [2]

Suggest **one** problem of using cattle manure as a fertilizer.
.....…….[1]

(a) Describe the symptoms of **one** disease of poultry.

……
……
……

(b) How can the spread of this disease be prevented?

……

State two problems caused by deforestation.
1. .....
2. .....[2]

A farmer wants to grow crops on a piece of land.
Suggest **two** factors that will influence his choice.
1. .....
2. .....[2]

Explain how soil is formed from parent rock by physical weathering.

……
……
……

Explain why mulches can be used in the production of field crops.
.....
.....
.....[2]

Name a root crop. .....

Use the diagram for question

What other steps are needed to turn this area into farmland?
.....
.....
.....[2]

State **three** undesirable consequences of deforestation.

1. .....
.....

2. .....
.....

3. .....
.....[3]

Explain why crop rotation would help control a pest
.....
.....
.....[2]

The diagram below shows weathering of rocks. Use it to answer questions that follow.

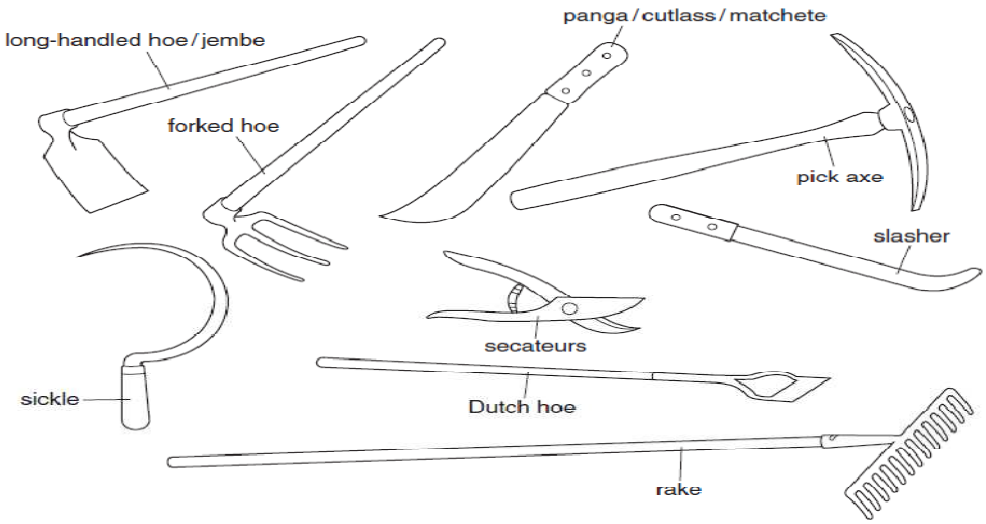

State **three** methods of weathering indicated by this diagram.

1. .....
2. .....
3. ..... [3]

Describe the structure and characteristics of a loam
soil.……
……

The diagram below shows farm tools. Use it to answer question

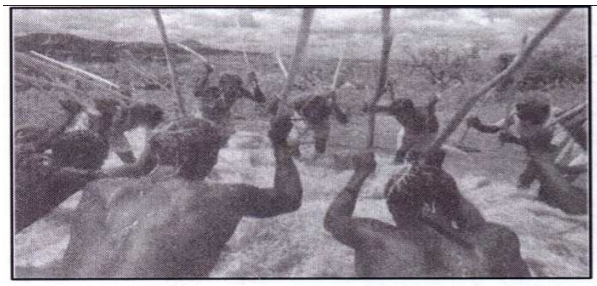

Which tool is suitable for controlling weeds?

……

Diagrams N, P and Q show the processing of field crops. Use them to answer questions

A

B

C

Name the processes shown.

A. …….
B. …….
C. …….

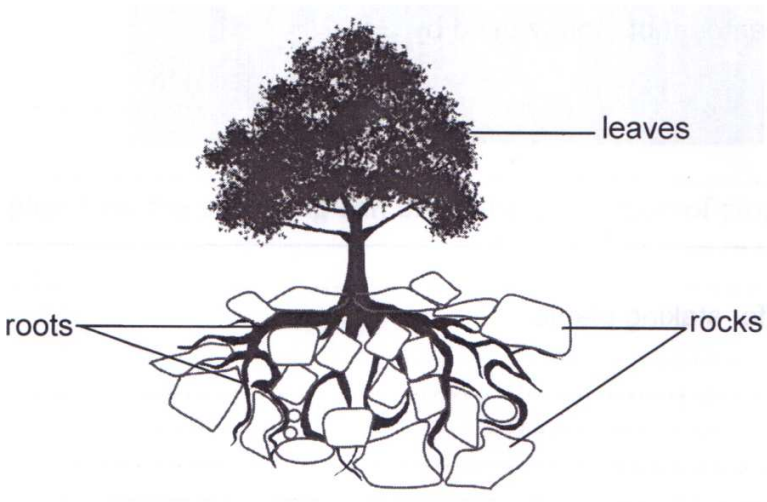

Describe any one of the processes shown above

……
……
……

State two reasons for staking plants.

……
……

Study the diagram below carefully

Name the type of weathering shown by the diagram above.

……

State the difference between agents and causes of soil erosion.

……
……
……

State **two** management practices that can be carried out on chickens kept inside a livestock house.

……
……
…… ..(2)

The diagram below shows girls sweeping an area where they are going to make plots for growing crops.

Explain how the sweeping can affect the production of crops in the plots.

……
……
……
……..(2)

Give names of any two breeds of goats.

(a)…… (b)……..

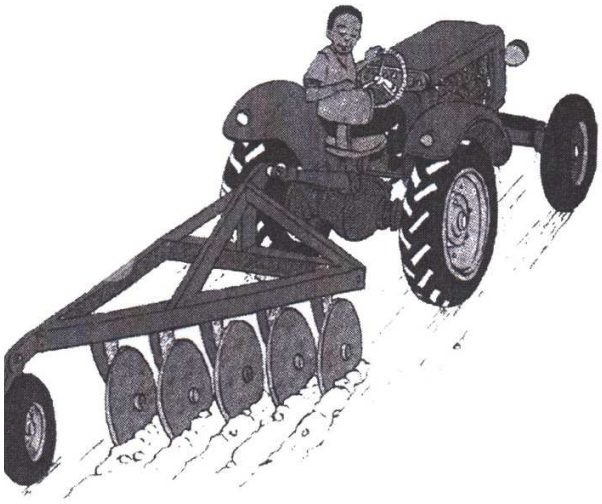

Explain why you would advise people to eat fruits.

……
……
……...(2)

State ways in which farmers can improve soil fertility.

……
……
……...(2)

The diagram below shows a tractor pulling a farm implement. Use it to answer questions that follow.

Name the farm implement.

……..

Give three ways in which you can take care of the farm implement.

……
……
……(3)

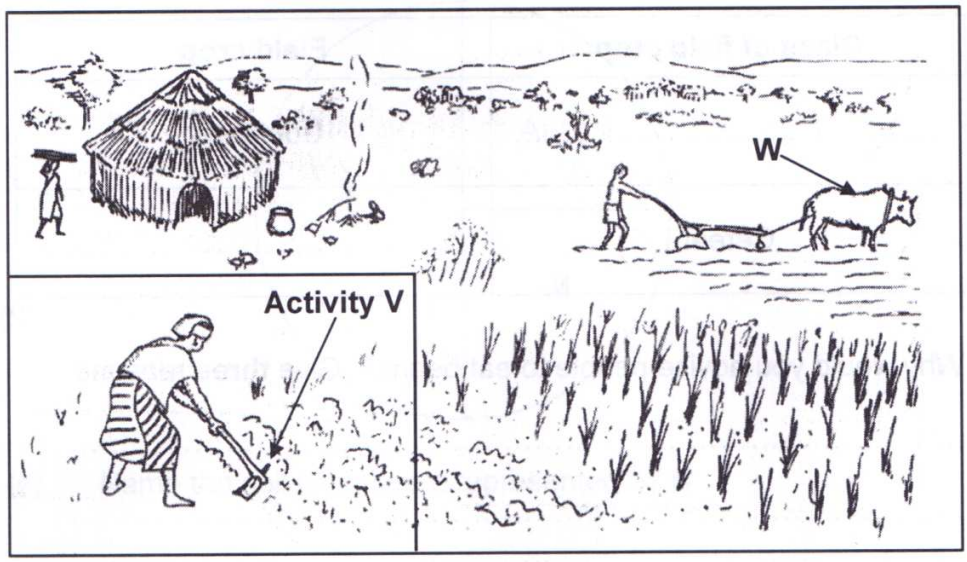

Name a tool that can be used to do the same work as the one done by the implement.

……..

Name the type of soil that is best for growing most crops.

……...

The diagram below shows a type of farming. Use it to answer question.

Name the type of farming shown

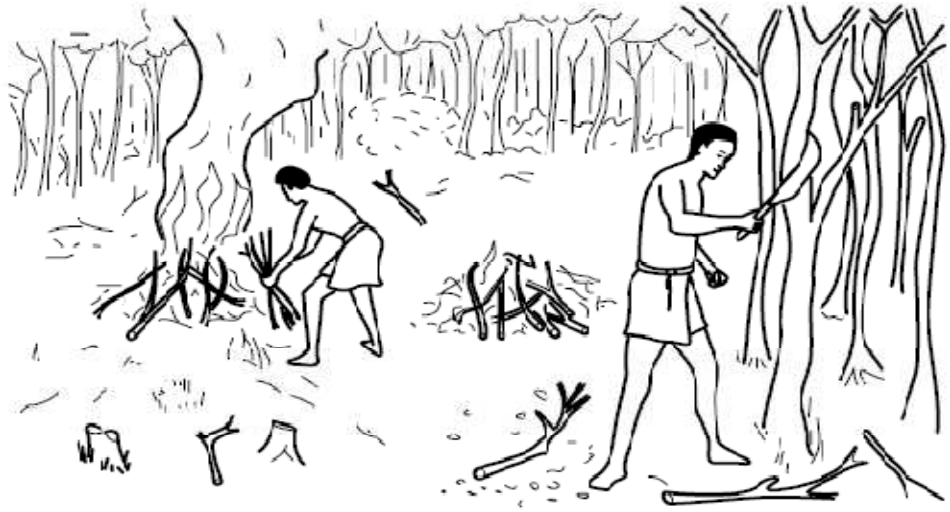

Give three ways in which the activity labeled V can improve the growth of crops

……
……
……...(3)

Name a branch of agriculture under which the figure labeled W falls.

Explain how cultivation may improve
Soil structure.....
Soil fertility. ..... [2]

The diagram below shows an area where clearing, stumping and burning are happening

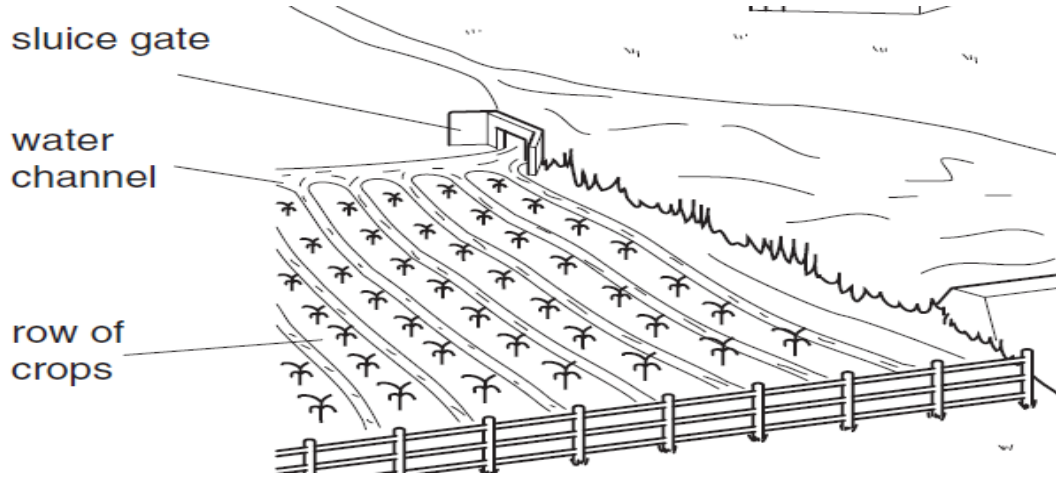

List the tasks needed to make a seedbed on the cleared land.

.....

.....

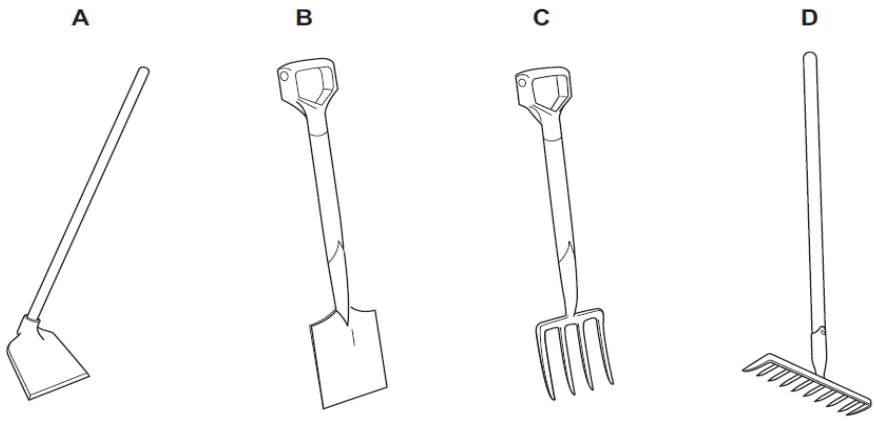

..... [3]

What name of irrigation is given to the method of irrigation used in the diagram below

.....

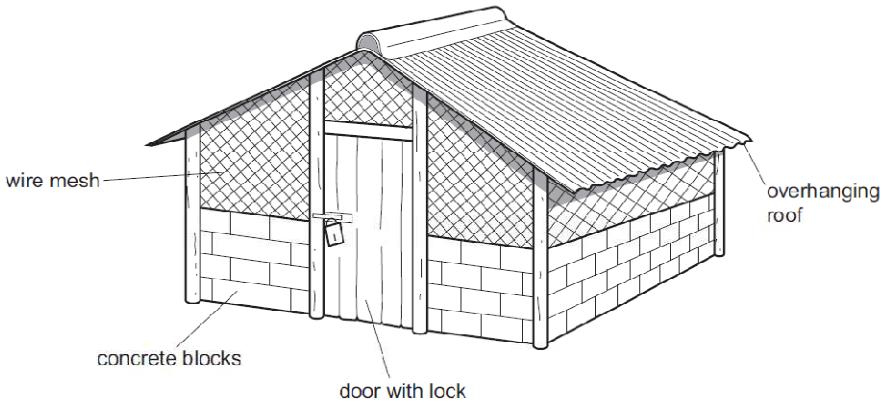

The diagram below shows four hand tools that can be used when preparing a seed bed.

State which tool, **A**, **B**, **C** or **D**, you have chosen.
.....
Explain the purpose of this tool in preparing a seed bed.
.....
.....
..... [2]

Describe how rust could be prevented on the metal part of the tool.
.....
.....

Use the diagram below to answer questions that follow

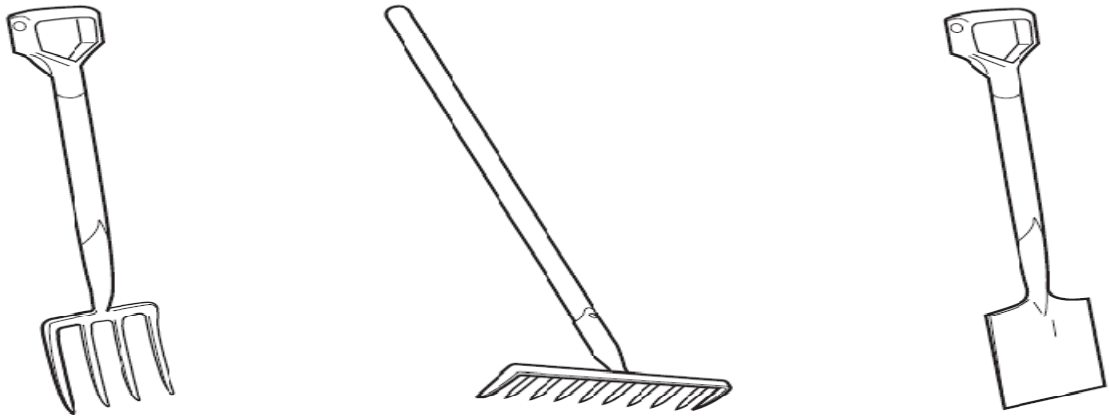

State one reason for each of the following features.

Door with lock……
Low walls made of concrete blocks……
Wire mesh above the solid walls……
Overhanging roof……

For a named animal, state three features that would be needed inside the building for animals to be kept there.
Animal……
1…….
2…….
3……. [3]

The diagram below shows three tools that can be used to prepare a seed bed in an uncultivated vegetable garden.

What is the order in which the tools are used to prepare a seed bed?
1…….. **2**…… **3**…….. [1]

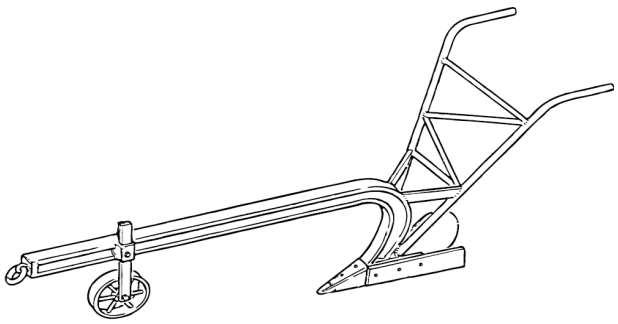

State the function of each tool in preparing the seed bed.

A……

B……

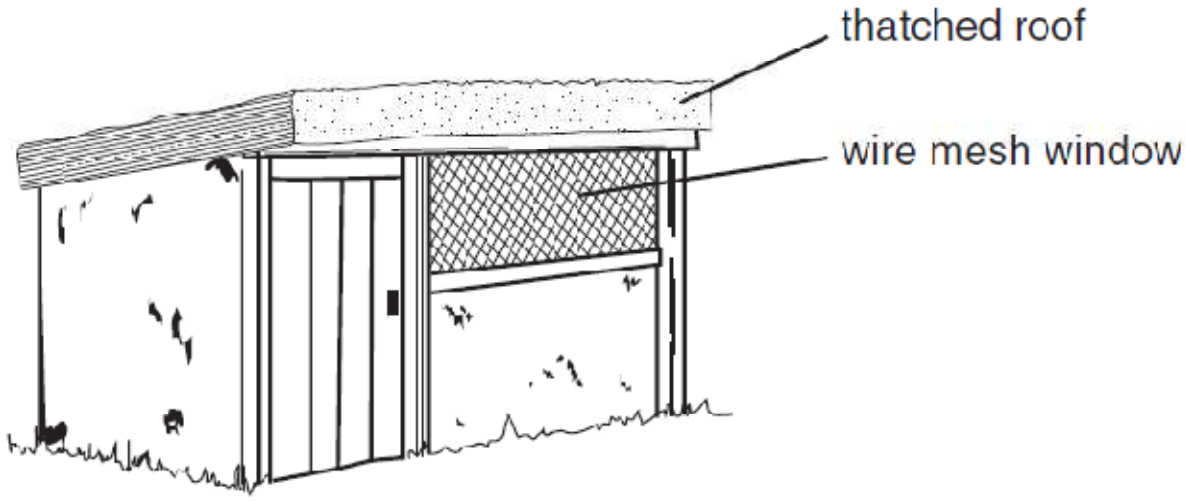

C……

What is the name of the farm implement below?

…….

The diagram below shows a building used to house small farm livestock. Use it to answer questions that follow

(i) State **one** advantage of the material used for the roof.
.....[1]
(ii) State **one** advantage of the material used for the window.
.....[1]
(iii) The floor inside the building is made of concrete.
Suggest **one** advantage and **one** disadvantage that a concrete floor has.
Advantage of concrete floor .....
.....
Disadvantage of concrete floor .....
.....[2]

Define crop rotation. .....
.....[2]

State two reasons for crop rotation.
1. .....
.....
2. .....
.....[2]

Explain how the following actions could cause soil erosion and describe how erosion could be prevented in each case.

(a) Sloping land is ploughed up and down the slope so that furrows run from the top to the bottom.

(i) How could this cause erosion?.....
.....

(ii) How could this erosion be prevented?
……
……[3]

(b) A crop is harvested from a field. The field is then left bare for two months after harvest so that the soil is exposed.

(i) How could this cause erosion?.....
……

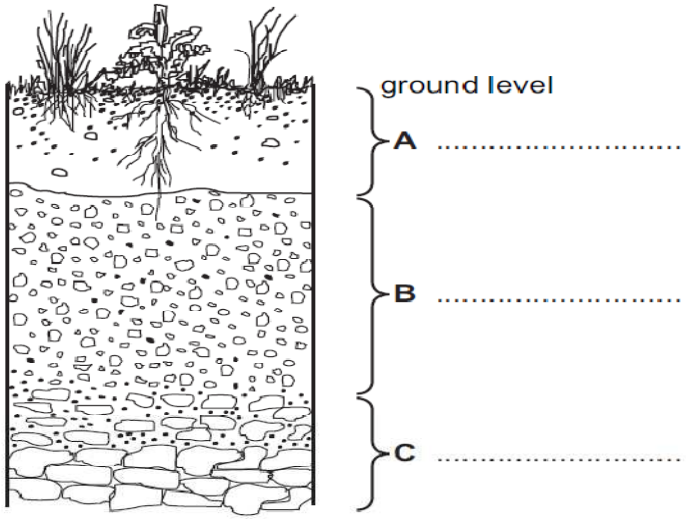

(ii) How could this erosion be prevented?.....
……[3]

(c) An area of pasture land is overstocked with grazing animals, which feed on the grasses until they are used up.

(i) How could this cause erosion?.....
……
(ii) How could this erosion be prevented?.....
……[3]

Mulch is used to protect a seed bed after sowing.
Give **one** way in which this can help seeds to germinate.
……[1]

Below is a diagram showing soil profile. Use it to answer questions that follow

(i) Complete the labels on the diagram, to give the names of the layers A, B and C.[3]
(ii) Which layer contains the highest proportion of humus?
……..[1]
(iii) Most plant roots are found in layer A.
Explain why most plant roots are found in this layer
……
……

State two other methods of weed control apart from spraying with herbicides.
1……..
2…… [2]

A house for small livestock, such as goats or calves, is to be built. Using the list below, complete the table with materials for the roof, walls and floor. Give a different reason for the choice of each material.

Thatch corrugated iron brick wood concrete earth

Part of building	Material	Reason
Roof		
Walls		
Floor		

Name two ways of preventing soil erosion on sloping land that is cultivated for crops.
1……
2…….[2]

State three conditions that seeds need for germination.
1……
2……
3…… [3]

For a type of livestock animal that you have studied, complete the following.
(a) Type of animal .....

(b) List **three** signs that the animal is in good health.
1. .....
2. .....
3. .....[3]

(c) (i) Name **one** disease that affects this type of livestock.
.....[1]

(ii) State **two** signs of infection by **this** disease.
.....
.....[2]
(iii) State **three** measures that can be taken to prevent an outbreak of this disease.
1. .....
.....
2. .....
……

For a **named** type of livestock, name a parasite that affects it.
type of livestock .....
parasite ..... [1]

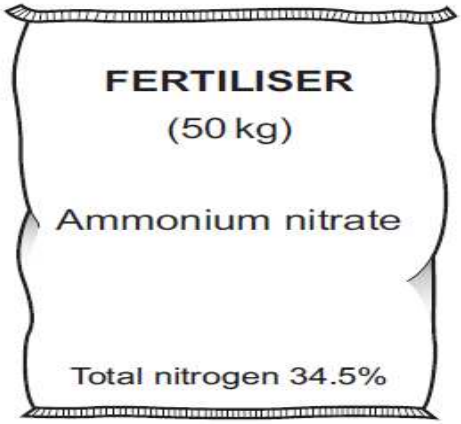

The diagram below shows three tools used to construct a wooden house for livestock. Use it to Answer questions that follow.

1 2 3

State the use of each tool in making the livestock house.
tool 1 .....
tool 2 .....
tool 3 .....[3]

What type of fertilizer is shown by the diagram below?

……..

Name any **two** soil constituents.
……
……
……
…… (2)

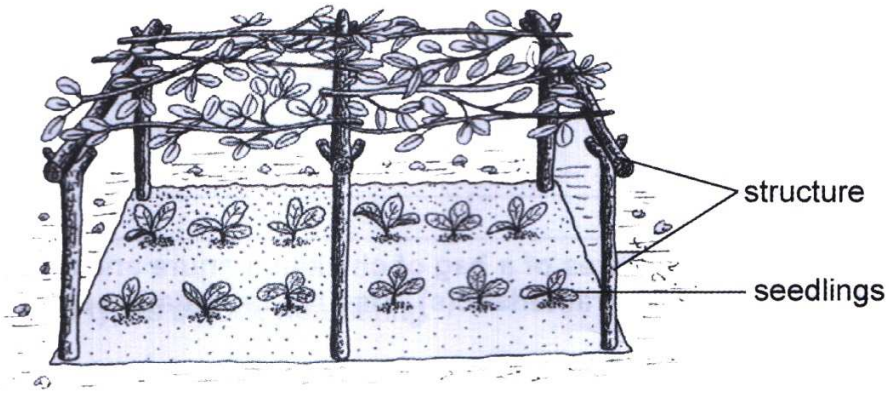

The picture below shows a piece of damaged land.
Use it to answer question that follows

State the **two** factors that caused the damage

……
……
…… (2)

The diagram below shows a structure used in crop production and seedlings. Use it answer a Question that follows

Give two reasons why the structure is used in crop production

……
……
……
(2)

Use the information below to answer question

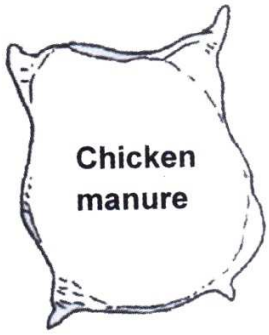

A farmer planted crops in fertile soil. However, in five days the crops started to wilt.

Give **two** reasons why the crops were wilting.
…….
…….
…….
(2)

State any **two** problems of ploughing on sloping land.
…….. …
……
……(2)

Given below are pictures of a bag of chicken manure and a bag of N.P.K fertilizer and their Characteristic(s). Use the information and diagram to answer question

Draw arrows to match each of the fertilizes with its characteristic (s)
One has been done for you

Characteristics

Artificial fertiliser

Adds microbes to the soil

Improves soil structure

Releases nutrients fast

An area has top soil which is loam and is 30 cm deep.
Give **two** reasons why the area is suitable for growing vegetables.

……
……

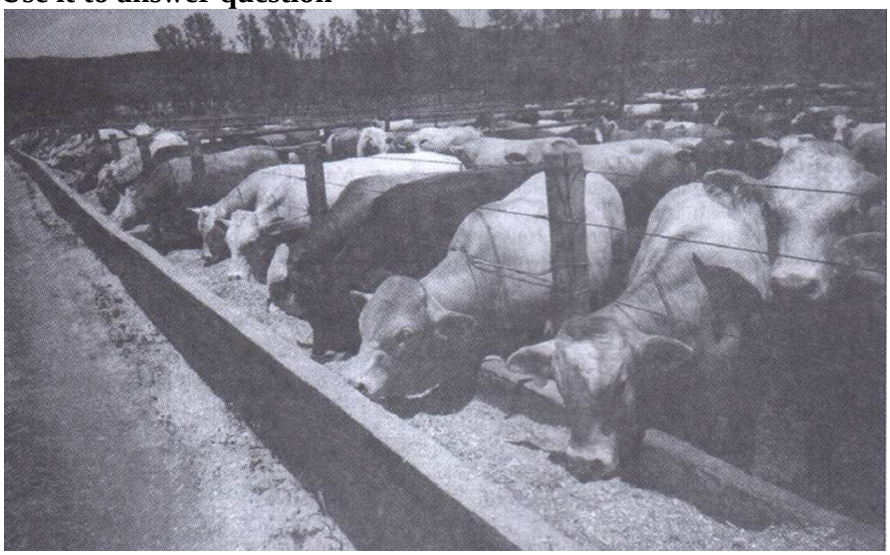

(2)

Name any **two** types of rock weathering.

……
……

(2)

The picture below shows an activity carried out by animals in a kraal
Use it to answer question

State **three** ways in which the activity benefits the animals

……
……
……

(3)

The information below was taken from a farmer`s records
Use the information to answer question

A farmer bought 3 bag of chicken feed at P50 each. He bought 5 layers for P100.00 and collected 60 eggs in the first month.

(a) Using the information , complete the table below to show the farmer`s financial and production records.

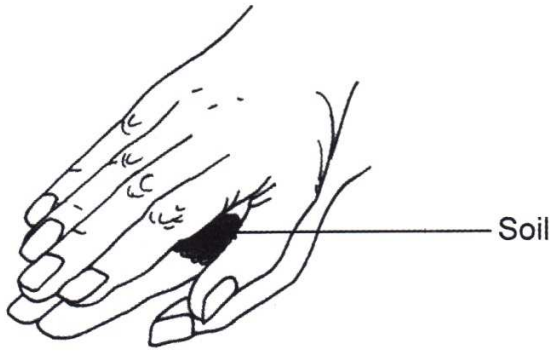

Finacial Records	Production Records

(b) How much did the farmer spend altogether? Show your working.

……
……
……

(2)

The diagram below shows soil being tested by rubbing it between two hands. Use to answer question (a) and (b)

(a) What characteristic is being tested from the diagram?

.....
.....(1)

(b) Give **three** ways in which the results of the soil test can benefit a farmer

……
……
……..(3)

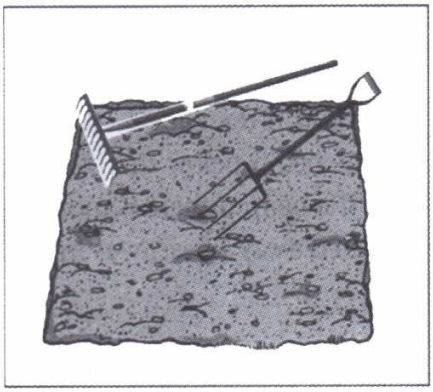

(c) Name the type of soil that needs frequent watering when plants are growing on it.

…….....(1)

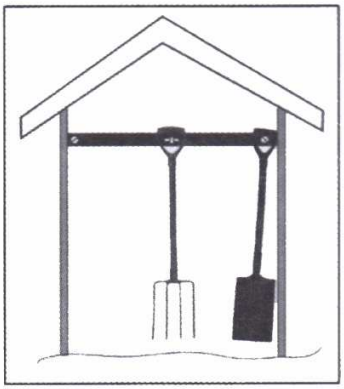

Use the information and diagrams below to answer questions (a) and (b)

Students used different tools to conduct practical activities. After the practical, one student stored as shown in **P** and another student stored the tools as shown in **Q**

P

Q

(a) Which of the diagrams **P** and **Q** shows the correct way of storing the tools?
..... (1)

(b) Give **two** reasons for your answer in (a)
……
……
…… (2)

(c) A bag of fertilizer costs P50.00
What is the total amount for 5 bags? Show your working.
……
……
…….. (2)

The diagram below shows a boy carrying out a crop management activity
Use it to answer question

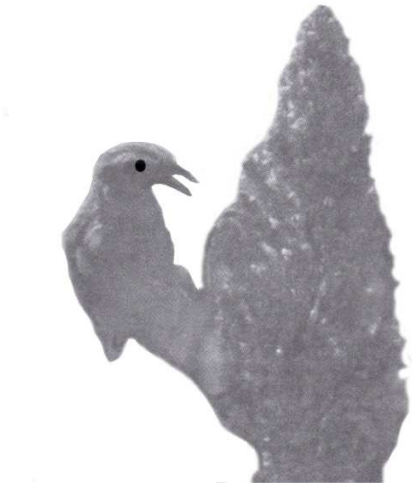

(a) Name the management activity carried out by the boy
.....
..... (1)

(b) Name the tool used by the boy to carry out the management activity.
…… (1)

(c) State **three** reasons carrying out the management activity.
.....
.....
..... (3)

The diagram below shows a pest on a crop. Use it to answer question (a) and (b).

(a) Name the pest
…… (1)

(b) State three ways through which the pest can be controlled without damaging the environment.
……
……
…….. (3)

(c) Name any tool that can be used to harvest filed crops.
……
…….. (1)

(a) Name the parasite that is likely to be picked up from eating half cooked meat.
…….. (1)

(b) State **three** ways of controlling the spread of the parasite named at **(a)** above
……
…… (3)

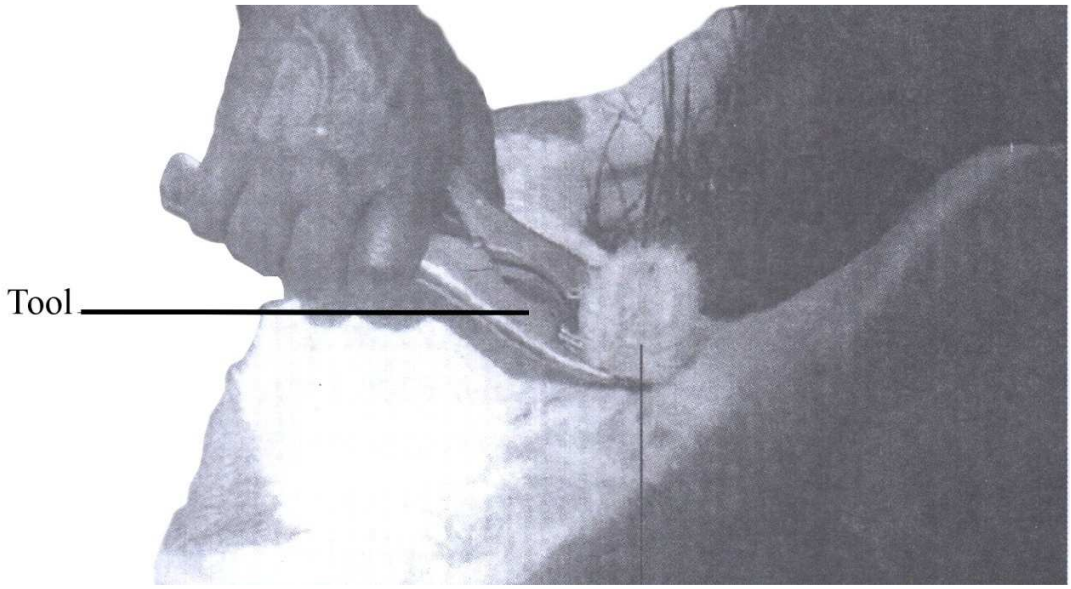

(c) Where do farmers sell beef cattle in Botswana?
……. (1)

(a) Name any implement that can be drawn by a tractor when ploughing
…… (1)

(b) State three disadvantages of using a tractor in farming
……
……
…….. (3)

(c) Name a branch of Agriculture which involves the use of a planter.
……
…….. (1)

The diagram below shows a management activity being carried out on the animal. Use it to answer question (a) and (b)

(a) Name the management activity being carried out on the animal.
……. (1)

(b) Name **two** tools that can be used when carrying out the management activity.
.....
..... (2)

(c) Give **two** reasons for dehorning.
……
……. (2)

Mr. Molemi observed that the soil in his field had been carried away. Give two **ways** by which the soil could have been carried away.

……
……. (2)

Use the information below to answer question

A farmer keeps his animals in a clean environment and makes sure that the feeds and water provided are clean. He also makes sure that the animals are grazed on different places and are dipped regularly

Name **one** parasite which the farmer could be controlling by using the method.

…….. (1)

With the aid of a diagram, name and describe the type of any plot that you prepared in your school.

Name

……

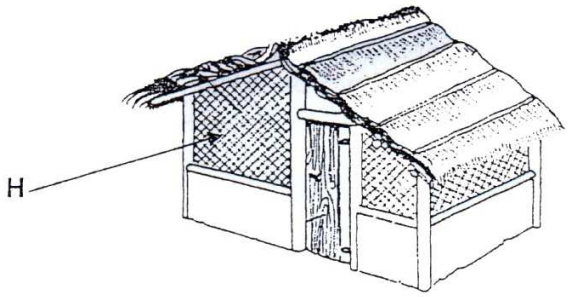

Diagram

Description:…….

……

……. (1)

The diagram below shows an animal house.
Use it to answer question

(a) Name the feature labeled **H.**
…… (1)

(b) State two reasons why feature **H** is important.
……
…… (2)

Which tool can be used to mix manure with soil in a vegetable?
…….. (1)

Give one example of each of the following:

Indigenous fruit	**Exotic fruit**

(2)

Use the information below to answer question

Mr. Zingoro`s goat was observed as having the following symptoms; weight loss, loss of appetite and drop in milk production.

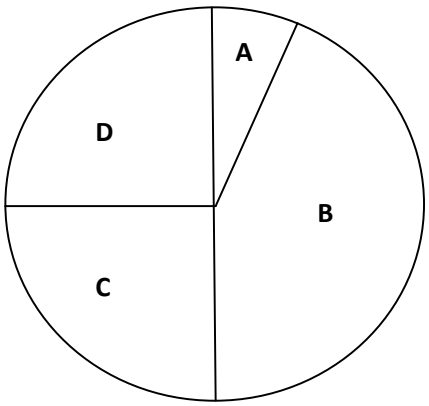

(a) What could be the problem with the goat?
……(1)

(b) State two ways in which Mr. Zingoro can help the goat to get better.
……
…… (2)

Name any one vegetable crop that you have studied and state its soil requirement.

Vegetable	**Soil requirement**

The illustration below shows the proportion of soil constituents in a normal soil sample. Use it to answer question

Name the soil constituents labeled A and B

A …….

B …….. (2)

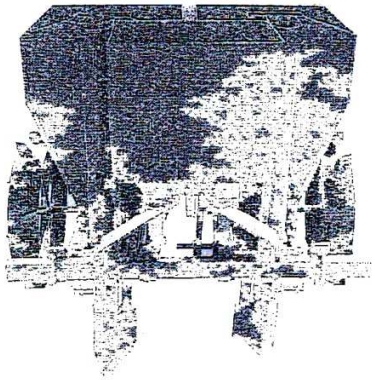

You have been asked to choose an area in your school when you could do vegetable production. State and explain **one** factor to consider when choosing the site.

Factor: …….

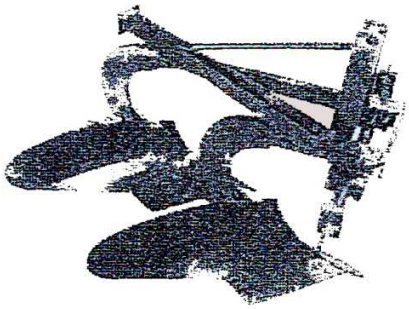

Explanation:……
……..
(2)

Use the diagrams of farm implements shown below to answer question

W

X

(a) Name the implement labeled **W**
……(1)

(b) State the uses of implements **W** and **X**.
W…….
X…….. (2)

(c) Why should implements be kept in a storeroom?
……. (1)

(d) A farmer painted the implements. How will the painting of implements help in increasing their life span?
……
……. (1)

(a) Name **one** general method of controlling pests in field crops.
……. (1)

(b) Name any **two** field crops that are an important part of the diet for **HIV** and **AIDS** patients.
……
……. (2)

(c) State how each of the two field crops in (b) can help **HIV** and **AIDS** patients.
……
…….. (2)

(a) Name any **two** breeds of beef cattle reared in Botswana.
……
…… (2)

(b) State **three** characteristics of any one breed named in (a).

Breed……

Characteristics…… (3)

Use the information below to answer questions (a) and (b).

A commercial pastoral farmer bought 100 bales of hay at P995 for her 10 animals. The bales lasted for 5 days.

(a) How many bales of hay were eaten by **one** animal per day?
…… (1)

(b) Which type of record is used to record the information on the 100 bales bought?
…… (1)

Use the information below to answer (c)

Mr. Nono owns a 100 hectares farm , a tractor, a combined harvester and a borehole. He plants the whole farm and supplies local stores with farm produce.

(i) Which system of farming is practiced by Mr. Nono?
…… (1)

(ii) State **two** disadvantages of the system practiced by Mr. Nono
……
…… (2)

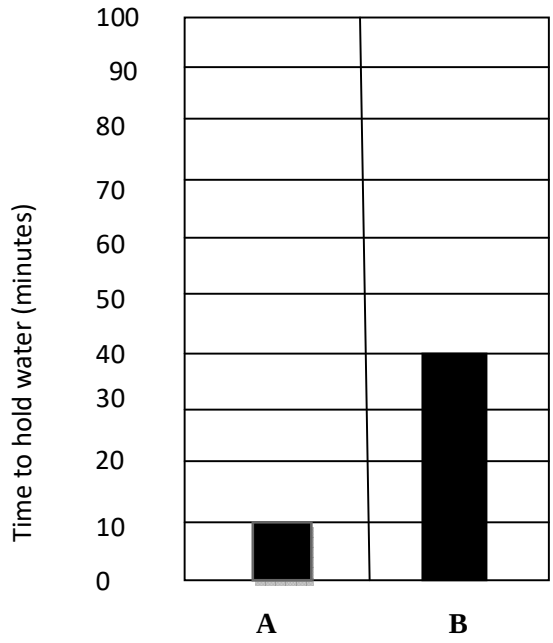

Use the information below to answer question

A farmer who practices mixed farming is advised to stop ploughing along the slope

(a) What problem will the farmer face if he **does not** follow the advice?
..... (1)

(b) What will be the correct way for the farmer to plough his field?
…….. (1)

Below is part of a graph showing soil structure A and B and the time they take to hold water. Use it to answer questions (c) and (d)

(c) Name the soil structure represented by the letter **A.**
…….. (1)

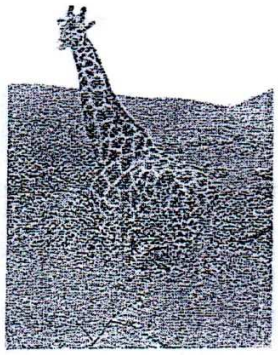

(d) The soil structure represented by the letter **B** holds water for a longer time. Give **two** characteristics of soil structure **B.**
……
…… (2)

(a) State any two disadvantages of protecting wild animals.

……

…….. (2)

Use the diagram below to answer questions (b) and (c)

(b) Which type of animal is shown in the diagram above?

…… (1)

(c) Give two ways in which the animal is important to Botswana.

……

…… (2)

(a) Name an external parasite that you have studied which affects animals.

…….. (1)

(b) Draw and label the diagram of the life cycle of the internal parasite that affects animals. Use the space below

Use the information below to answer question

A student bought cabbage seeds for P100. He prepared cabbage plots at a cost of P400. He sold 360 heads of cabbage at P4 each.

(a) Copy and complete the form for the student`s financial record shown below.

Expenditure		**Income**	
Item	Cost	Item	Cost
Total		**Total**	

(b) (i) Calculate the profit or loss. Show your calculations below.

(2)

(ii) Did the student make a profit or a loss?

Answer: ……..

Reason: …….. (1)

Which branch of agriculture does a farmer who grows beetroots and orange fall under?

…….. (1)

State **two** types of fertilizers.

……
…… (2)

State any **two** advantages of protecting wild animals.

……
…… (2)

Give **two** practices that can make the soil to be carried away easily.

……
…… (2)

Complete the table below by naming one field crop and stating its spacing requirement.

Field crop	**Space requirement**

(2)

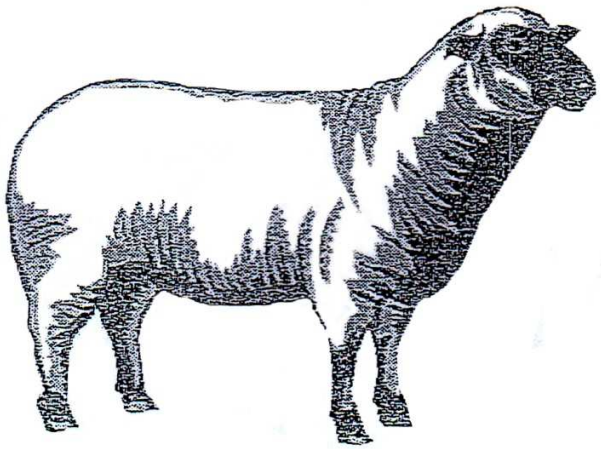

State **two** reasons for avoiding clay soils when choosing a vegetable garden side.

……
…… (2)

Why is it **not** necessary for a mixed farmer to frequently add organic fertilizer to his soil? Give **one** reason.

……
…… (1)

The diagram below shows a domestic animal. Use it to answer question 11

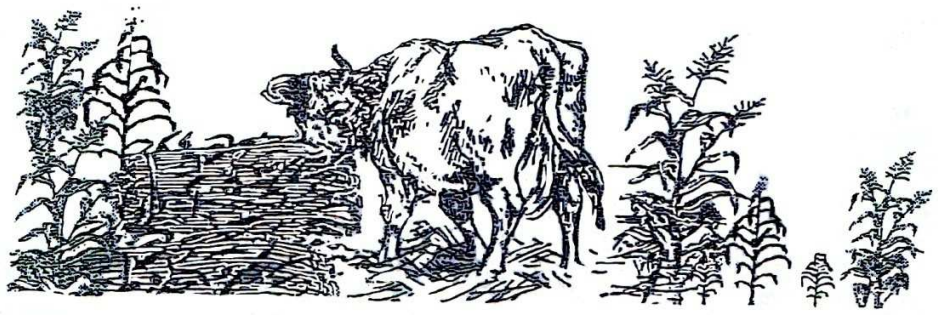

Give **three** ways in which the animal is important to Botswana.

……
……
…… (3)

Complete the table below by giving one internal and one external parasite of farm animals.

Internal parasite	**External parasite**

The diagram below shows a farm animal feeding on crop remains. Use it to answer question 6.

Give **two** advantages of the farming system shown above.

……
……..... (2)

Which tool can be used to transplant vegetable seedlings to their final place of growth?

…… (1)

With the aid of a well-labelled diagram, describe a soil profile which is suitable for growing a root vegetable.

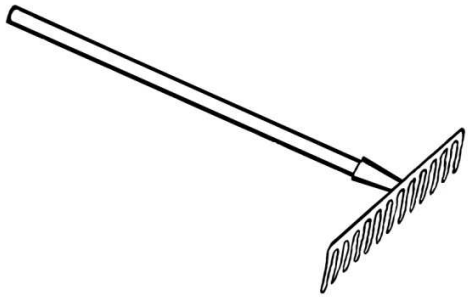

Diagram

(3)

Description

……
……. (2)

Use the diagram of a farm tool shown below to answer question.

(a) Name the tool
..... (1)

(b) State two uses of the tool
……
…… (2)

(c) Why should the tool be kept facing down?
…….. (1)

(d) Which implement can be used in the same way as the tool shown to perform a similar task in large fields?
…….. (1)

(a) Name **one** biological method of controlling pests in vegetable.
……. (1)

(b) Describe the biological method of controlling pests named in (a)

……
……
……. (2)

(c) State **two** advantages of any biological method of controlling pests.

……
…….. (2)

(a) Name **two** chicken breeds that are reared in Botswana.

……
…….. (2)

(b) State **two** uses of any chicken breed.

Breed…….
Uses……
…….. (2)

Use the information below to answer question

Mr. Yoni owns a 2, 5 hectare farm. He used 20 kg of maize seeds on this piece of land to produce food for his family

(a) Which type of record is used to keep information given above?

…….. (1)

(b) (i) Which system of farming is practiced by Mr. Yoni?

…… (1)

(iii) State **two** advantages of the system of farming practiced by Mr. Yoni

……
……. (2)

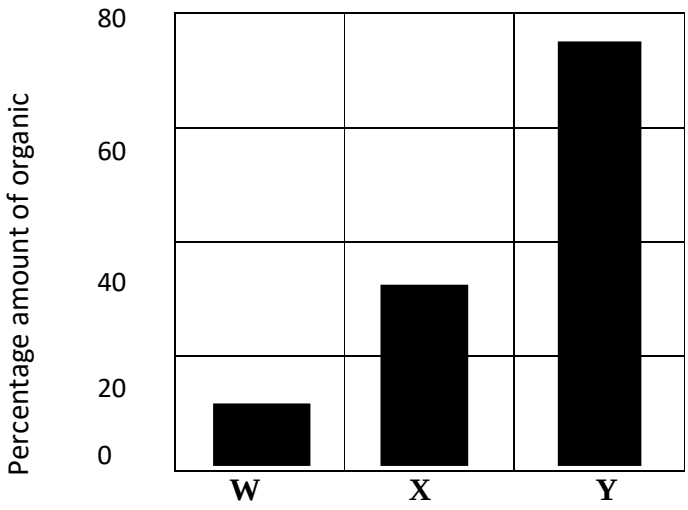

(c) How many kilograms of seeds did Mr. Yoni use in one hectare?
Show your calculations.

(2)

(a) Name **three** traditional bio-technology products.
……
…….. (3)

(b) Describe how any two traditional bio-technology products are produced.
……
……
…….. (2)

Below is a graph showing the percentage amount of organic matter contained in soil types W, X and Y. Use it to answer question.

(a) Which soil type will be easily waterlogged?
……. (1)

(b) Name the soil types represented by letters **W** and **Y**.
W……
Y……... (2)

(c) The soil type represented by the letter **X** has a moderate amount of organic matter. Give **two** other characteristics of soil type **X**.
……
…….. (2)

(a) Draw a livestock house showing a footbath.

(2)

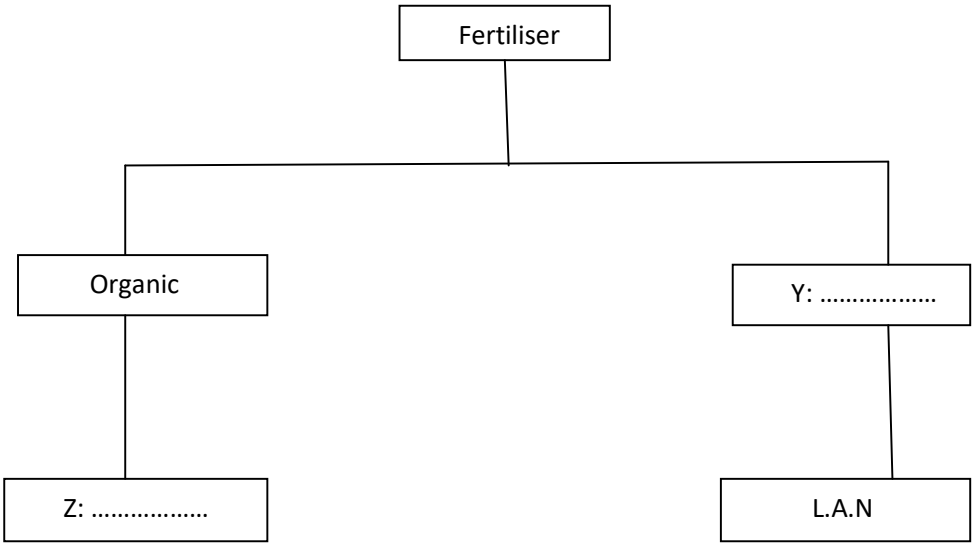

(b) Describe the footbath of a livestock house.
…….
…… (2)

(c) State how the footbath prevents people from bringing disease causing organisms into the house.
…… (1)

State any two careers in Agriculture.

……
…….. (2)

Study the diagram below showing two types of fertilizers.

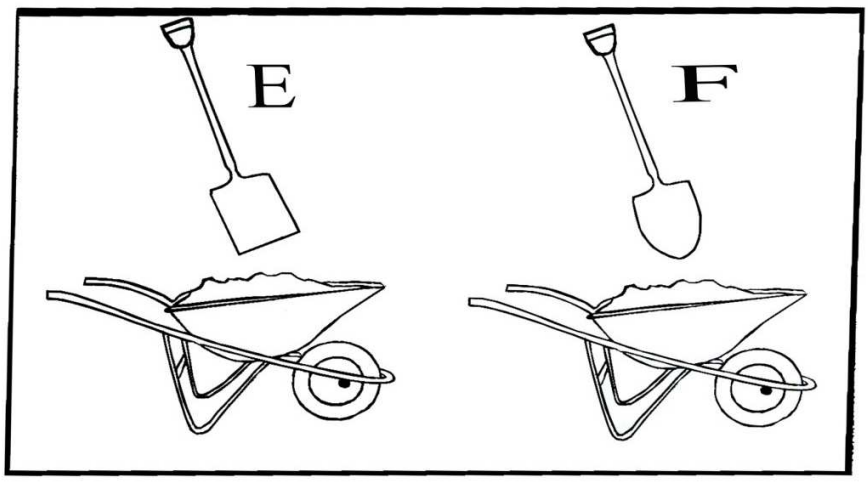

Complete the diagram by filling in the missing.

(a) Y: type of fertilizer
(b) Z: example of organic fertilizer (2)

Name any **two** types of plots.

……
…….. (2)

Study the diagrams below showing loaded wheel barrows E and F.

Which wheel barrow was loaded using the correct tool?

……?

Read the discussion between farmer A and farmer B below.

Farmer A: I want to produce maize, but I do not know how to do it.

Farmer B: Producing maize is very easy. I have done that for 25 years but my problem is that I do not have enough money to expand my business.

What advice can you give to farmer A and farmer B to help them solve their problems.

	Advice
Farmer A	
Farmer B	

What farmers can do to make sloping land good for crop production? Give two ways.

……
……. (2)

Name **two** management activities that are carried out after harvesting in order to make the vegetables attractive to buyers.

……
…….. (2)

Study the information below carefully

A farmer bought 10 bales of silage at P95 for 2 animals. The bales lasted for 2 days

How many bales of silage were eaten by one animal per day? Show tour calculations.

……
…… (2)

What farmers can do to make their vegetables stay for a longer time after harvesting? Give **two** ways?

……
…….. (2)

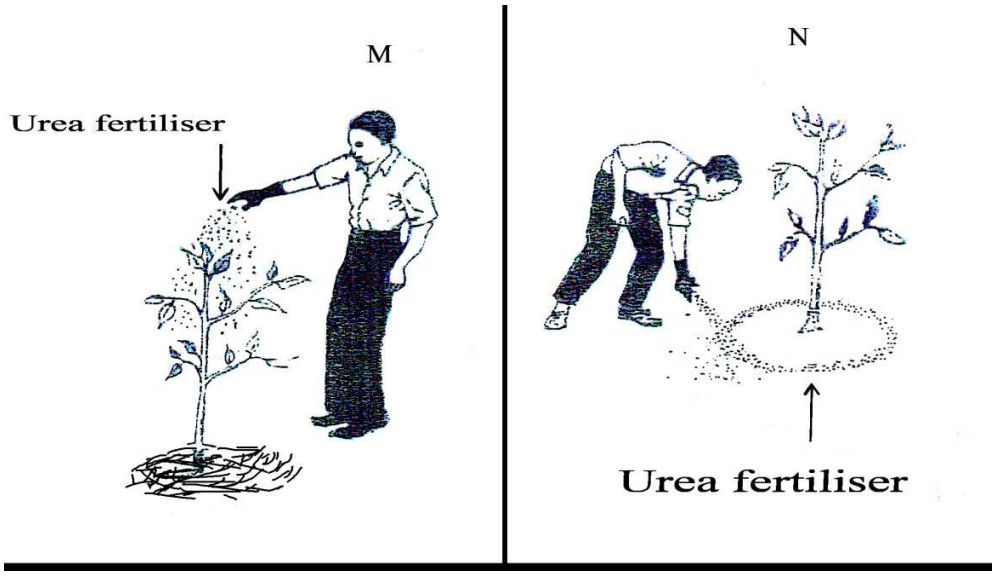

Name **one** indigenous fruit tree in Botswana.

…… (1)

Give names of any **two** breeds of dairy cattle.

……
…….. (2)

Study the diagram below carefully

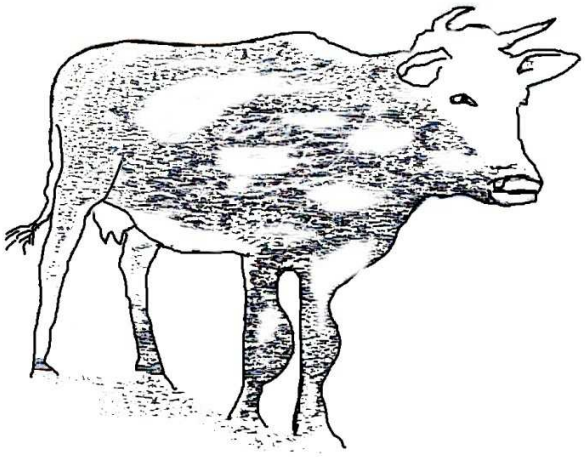

(a) In which diagram was the fertilizer applied correctly?
..... (1)

(b) State three reasons for your answer in (a)
……
……
…….. (3)

(c) Name two management activities that are carried out after applying fertilizers.
……
…….. (2)

Study the picture below carefully

(a) Name the animal shown in the picture
……. (1)

(b) What is the cause of the condition that the animal is suffering?
……. (1)

(c) Give names of any **three** breeds of cattle that farmers can rear in order to supply BMC?
……
……

The diagram shows a handling test being carried out on a moist soil sample.

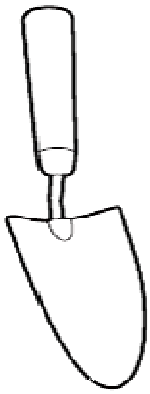

The soil feels crumbly and just holds its shape when rolled.

i. What type of soil is being described above?
…… (1)

ii. The above type of soil is found in which type of soil structure?
…….. (1)

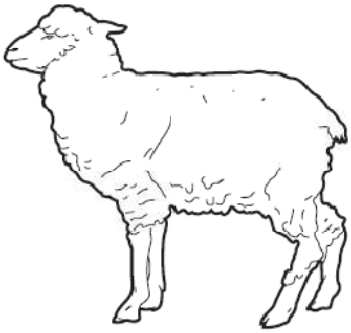

iii. Give any **two** characteristics of the soil named in (i).
……
…… (2)

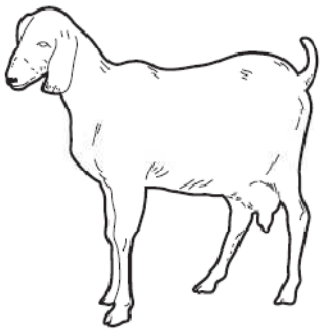

Use the diagram below to answer questions

i. Name the tool and its use
Tool: …… (1)
Use: …… (1)

ii. Give **two** ways of taking care of the above tool.
……
…….... (2)

State any **two** management practices of the above animals

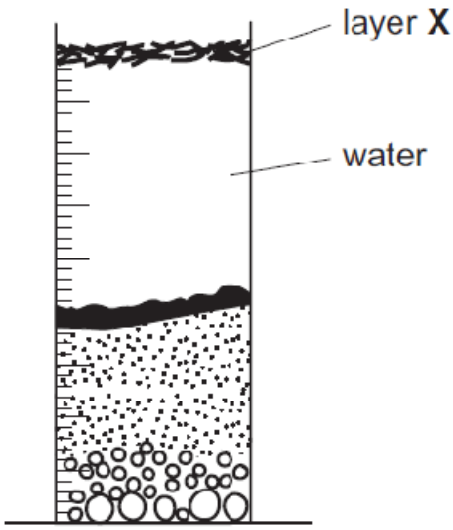

……
…….. (2)

Give any **two** diseases of the above animals

……
…….. (2)

Use the diagram below to answer questions

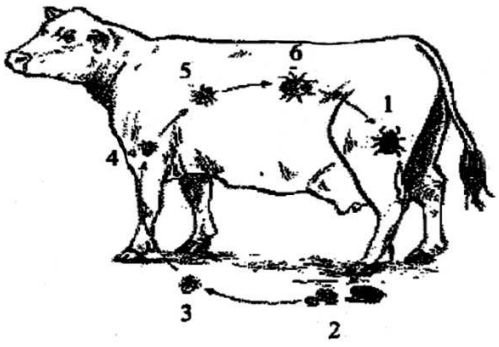

Some soil is shaken with water in a jar.

i. Which is the name given to layer X?
…… (1)

ii. Give **two** characteristics of the layer labelled X.
.....
..... (2)

Study the picture below and answer questions that follow

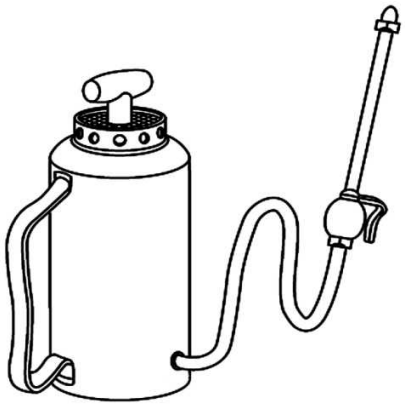

i. Name the parasite shown by the picture
…… (1)

ii. State **two** ways of controlling the above parasite
……
…….. (2)

iii. Name a disease that is caused by the parasite named in (i).

Use the diagram to answer questions

i. Name the above tool
…… (1)

ii. Give **two** safety precautions to consider when using the tool.
……
…… (2)

iii. Name **two** ways of taking care of the tool
……
…….. (2)

---

i. State two advantages of using cattle manure rather than chemical fertilisers.
……
…… (2)

ii. Suggest **one** problem of using cattle manure as a fertiliser.
……(1)

Use the diagram to answer questions

Mr. Zingoro, an arable farmer is experiencing the above problem in his farm.

i. What could be the cause of the problem faced by Mr. Zingoro?
…….. (1)

ii. How can Mr. Zingoro solve this problem biologically? Give two ways
…….
…… (2)

The picture shows a man spraying crops in his field. Use it to answer questions

i. Complete the table below using the picture above

type of protection	reason for use
respirator	to prevent harmful chemicals entering lungs

(2)

ii. Which other protection material is required to ensure total protection from the chemical?

…….. (1)
