For Examiner's Use

SECTION A (20 marks)

Answer **all** questions.

1. Name any **two** agents of physical weathering.

.....

..... (2)

---

2. State **two** reasons for keeping farm records.

.....

..... (2)

---

3. State **two** reasons why weeds can reduce the amount of crop produce in a field.

.....

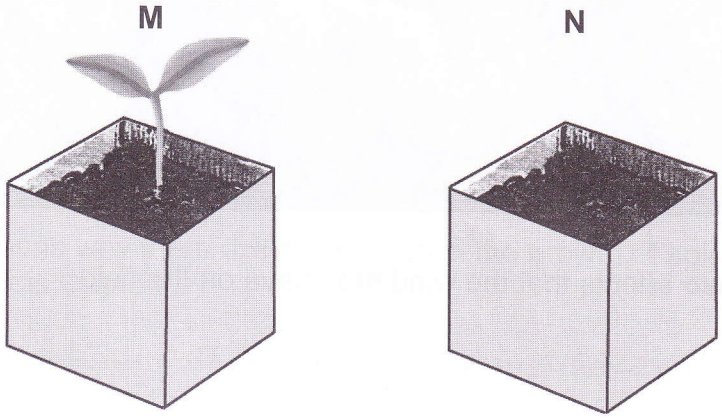

.....

..... (2)

For Examiner's Use

Use the information and the diagrams below to answer question 4.

A seed was planted in pot **M** and another seed of the same size and type was planted in pot **N**. Both pots were placed in the same room and were given the same amount of water. After 10 days the seed in pot **M** had germinated while the seed in pot **N** had not.

4. Give any **two** possible reasons why the seed planted in pot **N** did not germinate.

.....

.....

..... (2)

For Examiner's Use

The diagram below shows what happens when wind blows over a field which has crops. Use it to answer question 5.

5. Give **two** effects that the wind may have on the field.

.....

.....

..... (2)

The diagram below shows stages of making a compost. Use it to answer question 6.

6. Name **two** different materials that can be found at stage **X**.

.....

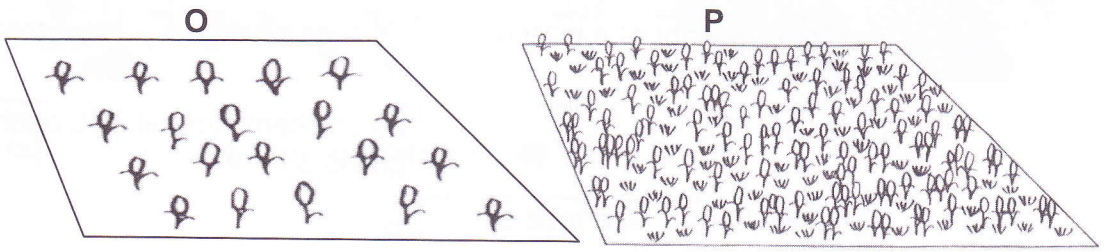

.....

..... (2)

For Examiner's Use

Use the information and the diagrams to answer question 7.

Spinach seeds were sown in plots **O** and **P** at the same time. The diagrams below show how the spinach seedlings developed after three weeks.

7. State **two** reasons why there are differences in the growth of spinach seedlings in plots **O** and **P**.

.....

..... (2)

---

8. State **two** ways in which the growth of trees in rocky areas can help to improve soil fertility.

.....

..... (2)

---

9. Give **two** ways in which hoof trimming can be helpful to animals.

.....

..... (2)

---

10. Give **two** ways in which the rearing of chickens can benefit a family.

.....

..... (2)

For Examiner's Use

SECTION B (40 Marks)

Answer **all** questions.

11. (a) Complete the financial record of a chicken farm shown below.

Costs	Returns
Egg trays bought at a total of P20	Dozens of eggs sold at a total of P200
Water bill P25	20 chickens sold at P40 each giving a total of P.....
20 chicks bought at a total of P200	
Total Costs P.....	Total Returns P.....

(3)

(b) How much profit or loss did the business make?
Show your working.

.....

.....

.....

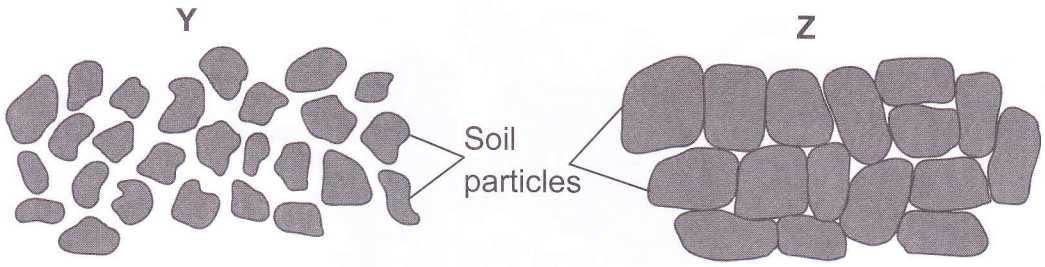

..... (1)

(c) Did the business make a profit or a loss?

..... (1)

For Examiner's Use

The diagram below shows two types of soil structure labelled Y and Z. Use them to answer question 12.

12. **(a)** Name the types of soil structure **Y** and **Z**.

Y .....

Z ..... (2)

(b) Which of the types of soil structure shown in the diagram is suitable for crop production?

..... (1)

(c) Give **two** reasons for your answer in **(b)**.

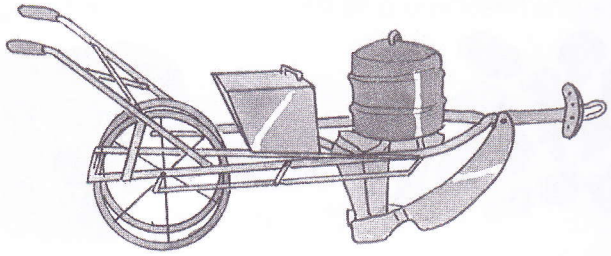

.....

.....

..... (2)

For Examiner's Use

The diagram below shows a farm implement. Use it to answer question 13 (a).

13. **(a)** Give **two** ways of taking care of the implement shown.

.....

..... (2)

(b) State **one** advantage of applying an inorganic fertiliser to the soil.

..... (1)

(c) A farmer uses two bags of fertiliser to cover one hectare.

How many bags are required to cover 20 hectares?
Show your working.

.....

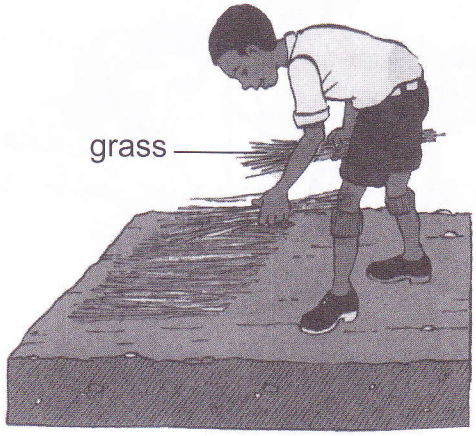

.....

.....

..... (2)

For Examiner's Use

The diagram below shows a boy carrying out a management activity on a vegetable plot after sowing. Use it to answer question 14.

14. **(a)** Name the management activity being carried out by the boy.

..... (1)

(b) Give **two** ways in which the management activity helps in growing vegetable crops.

.....

..... (2)

(c) List **two** other materials apart from grass that can be used when carrying out the management activity.

.....

..... (2)

For Examiner's Use

Use the information below to answer questions 16 (a) and (b).

A farmer sprayed his livestock with a chemical to control parasites. The following day the farmer fell sick because of the chemical he used on his livestock.

16. **(a)** Give any **two** precautions that the farmer could have taken so that he does not fall sick.

.....

..... (2)

(b) The farmer sprayed his livestock to control parasites.

State **three** other ways that the farmer can use to control the parasites.

.....

.....

..... (3)

---

17. **(a)** What is the percentage of water in the soil?

..... (1)

(b) Give **two** examples of nutrients that can be found in mineral matter.

.....

..... (2)

(c) The soil in a certain farm has very little organic matter.

Explain what will happen to cattle living in the farm.

.....

..... (2)

For Examiner's Use

Use the information below to answer questions 16 (a) and (b).

A farmer sprayed his livestock with a chemical to control parasites. The following day the farmer fell sick because of the chemical he used on his livestock.

16. **(a)** Give any **two** precautions that the farmer could have taken so that he does not fall sick.

.....

..... (2)

(b) The farmer sprayed his livestock to control parasites.

State **three** other ways that the farmer can use to control the parasites.

.....

.....

..... (3)

---

17. **(a)** What is the percentage of water in the soil?

..... (1)

(b) Give **two** examples of nutrients that can be found in mineral matter.

.....

..... (2)

(c) The soil in a certain farm has very little organic matter.

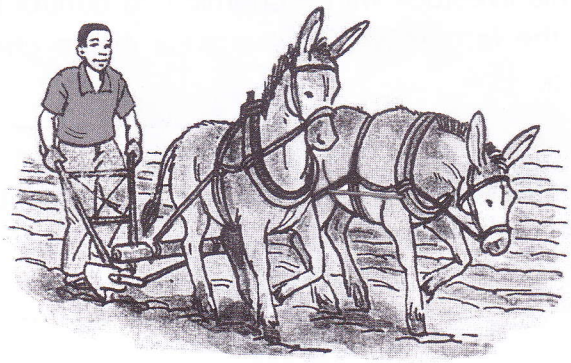

Explain what will happen to cattle living in the farm.

.....

..... (2)

For Examiner's Use

The picture below shows a man ploughing his one hectare field using animals to draw the plough. Use it to answer question 18.

18. **(a)** Name the level at which the man in the picture practises farming.

..... (1)

(b) Give **two** reasons for your answer in **(a)**.

.....

..... (2)

(c) State **two** ways in which the method of ploughing shown can affect the animals used.

.....

..... (2)
