# TERM 2

# CREATIVE AND PERFORMING ARTS

1. TEXTILE FIRES
2. FOOD
3. TWO DIMENSIONAL CRAFT
4. MEDIA
5. BUSINESS
6. CREATIVE DANCE
7. TRADITIONAL DANCE
8. GYMNASTIC MOVEMENTS

@MULA

# 4.6.1 TEXTILE FIBRES

***4.6.1.1 What is a fibre?***

- Fibre is a thin thread made from natural or man-made/ artificial substances.
- Fibre is also a thread that is used to make textiles or other fabric materials used in clothing.
- Textiles are woven materials made from fibre and in large quantities.
- Most of our clothing is made from textiles.

***4.6.1.2 Classes of Fibres***

Fibre is classified as follows:

**1. Man Made or Artificial Fibres:**

- It is made or processed from synthetic materials.

Examples include;

- Nylon
- Polyester
- Rayon
- Acrylic
- Polyamides
- Viscose

**2. Natural Fibres:**

- It made from natural sources like plants, animals and minerals.

Examples include;

- Cotton
- Wool
- Linen
- Silk

***4.6.1.3 and 4.6.1.4Classes of Natural Fibres and Examples***

**1. Plant:**

Example;

- Cotton from cotton plant
- Linen

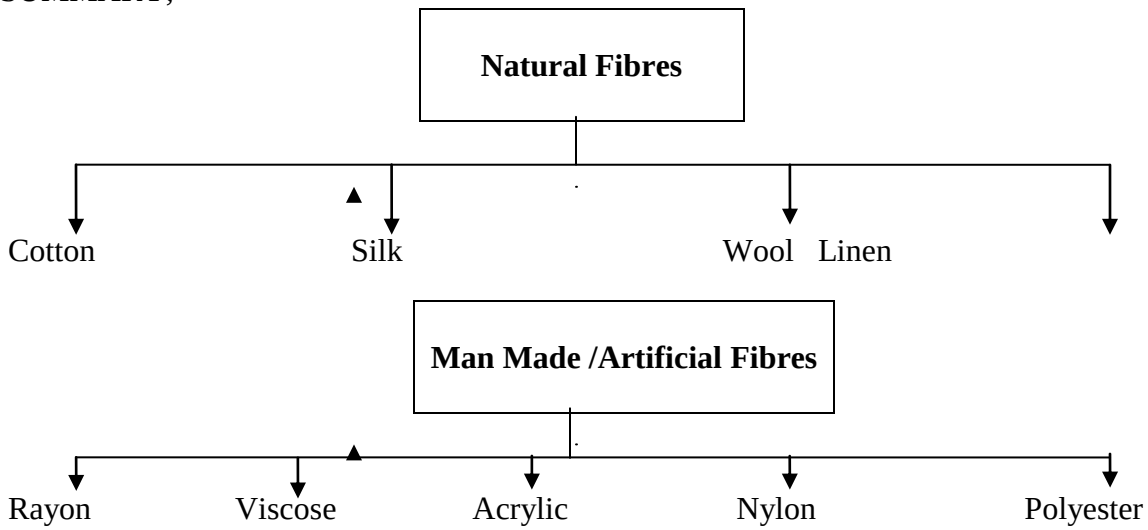

**2. Animal:**

- Silk from sheep or goat
- Wool from sheep or goat

**3. Mineral:**

- Asbestos
- Metal

SUMMARY;

## *4.6.2 SEWING TOOLS*

### *4.6.2.1 and 4.6.1.2 Basic Sewing Tool and their Uses*

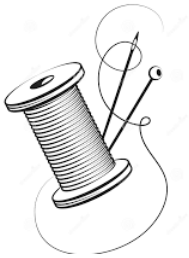

- Sewing is the art of joining fabrics to make clothes.
- Most clothes are made using sewing machine to make the work faster.
- Hands can also be used to make clothes but it will take long.

***Examples of sewing tools include:***

- **Needles;**

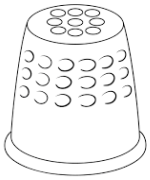

- They come in different lengths and thickness, E.g. fine, medium and large.
- Fine and medium one are good for sewing fine and thin materials while large ones are good for thick materials

- **Threads:**
- They have different colors and thickness

**Thimble;**

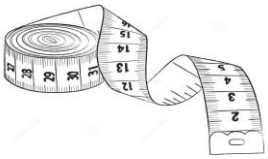

- It looks like atiny metal or plastic cup worn on the middle finger to protect it when sewing.

**Pins;**

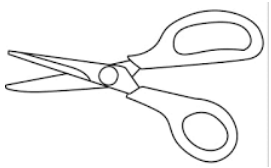

- Used to hold pieces of material together in correct position when sewing
- Pins are stored a pincushion or a pin case.

- **Measuring Tape or Meter Rule;**

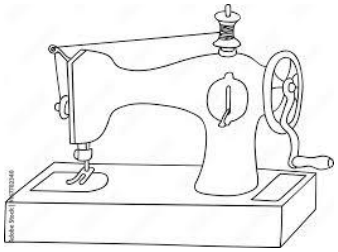

- It is used to measure the lengths of materials.

- **Scissors;**

- There are different scissors which are used for different purposes.
  E.g. Pinking Shears, Embroidery Scissors
  - it is important to use a good pair of scissors

- **Machines;**

- Hand sewing machine
- Electric sewing machine
- Treadle sewing machine

- **Tailor's pencil/chalk;**

- It is used to mark when cutting or sewing.

- **Iron;**

- Use iron to make fabric smooth
- Make sure you use the correct temperature for each fabric.

- **Ironing Board;**

- It is used to provide the surface when ironing.

***4.6.1.3 Care and Storage of Sewing Tools***

- Keep sewing tool out of reach of children.
- Keep sewing tools in a safe place.
- Use sewing tools for what they were made for.

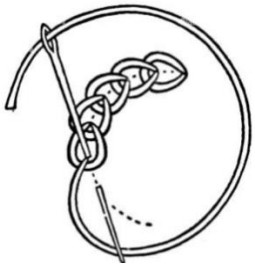

## 4.6.4 *EMBROIDERY STITCHES*

***4.6.4.1 Embroidery Hand Stitches;***

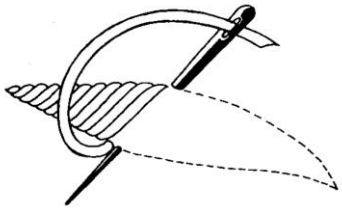

- Embroidery hand stitches can be used in a creative way to decorate clothing and household items
- Embroidery hand stitches include;

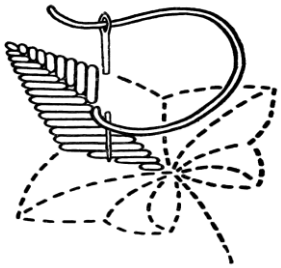

A. Chain Stitch;

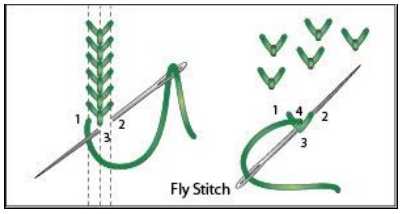

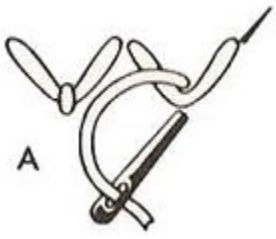

B. Satin Stitch;

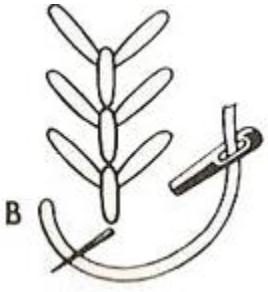

C. Fly Stitch;

***4.6.4.2 Uses of Embroidery Hand Stitches***

The above stitches can be used to decorate parts of garments. For example, collars, hems, table cloths and tray cloths.

## 4.6.5 SEAMS

***4.6.5.1 What is a seam?***

- A seam is a joint between two pieces of material or a row of stitches.
- A line where two pieces of fabric are held together with stitches.

***Examples of seam include;***

- Single seam
- French seam
- Closed single seam
- Open seam
- Run and fell seam

# 1.2.1 FOOD

***1.2.1.1 And 1.2.1.2 Classifying Food According To Their Groups and Function***

| FOOD GROUP | FUNCTIONS |
|---|---|
| 1. ***Protective Foods(Vitamins and Minerals)*** E.g.- Fruits like Orange, Apple, Pineapple etc - Vegetables like Cabbage, Spinach, Rape Carrots etc | - Protects the body against infection. - Helps to keep the body organs healthy - Help with digestion, absorption and release of energy from food - Boost the immune system |
| 2. ***Body Building foods(Proteins);*** E.g. Fish, Milk, Beans, Phane, Cheese, Chicken, Peas etc | - Promote Growth - Helps to repair damaged tissues and cells - Helps in formation of Strong teeth and bones -Helps the body to build strong muscles and other tissues |
| 3. ***Energy Giving Foods ( Carbohydrates);*** E.g. Sugar, Bread, Potatoes, Maize meal, Rice, Drink etc | - Provides the body with Warmth - Gives the body Power and Energy |
| 4. ***Energy Supplementary Foods (Fats);*** E.g. Butter, Groundnuts, Olives, Chocolate, Cooking Oil, Margarine etc. | - Protects the body and the Internal Organs. - Provides the body with Heat and Energy - Prevents the feeling of Hunger. |

**WATER;**

- Water is not a food, but it is the most important part of most foods.
- Water helps the body to;

- Build new cells and tissues
- Digest other nutrients
- Regulates body temperature
- Get rid of waste products.

**FIBRE:**

- It is also known as Roughage and is made from tough plant material.
- The body can't digest fibre but it helps the digestive system to work well.
- It is found in vegetables like carrots, potatoes, and beans
- It is also found in whole-wheat bread and other grains.

**VITAMINS AND MINERALS;**

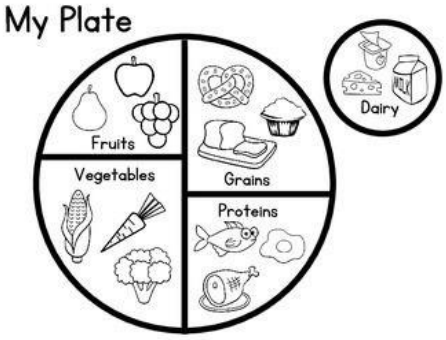

- There are about 20 different vitamins.
- The body needs very small amount of each of them.
- Most Vitamins are named using letters of alphabets.

| ***VITAMIN*** | ***WHERE IT COMES FROM*** | ***WHAT IT DOES*** |
|---|---|---|
| *Vitamin A* | *Milk, Yoghurt, Spinach, Squashes.* | *Keeps the eyes, skin, hair and bones healthy.* |
| *Vitamin C* | *Oranges, Lemons, Spinach, Tomatoes, Beetroot.* | *Helps to form healthy skin tissues* |
| *Vitamin D* | *Fish, Eggs, Milk, Yoghurt and from Sunlight* | *Keeps the bones and teeth healthy.* |
| *Vitamin E* | *Dark Green Vegetables, Whole-wheat grains.* | *Strengthens blood cells* |
| *Vitamin K* | *Dark Green Vegetables, Cabbage, Cauliflower* | *Keeps the blood and bones healthy.* |

- The most important minerals are; Calcium, Phosphorus, Potassium, Sodium, Chlorine, Magnesium, Zinc, Iron, Iodine and Copper.

***1.2.1.3 Balanced Diet or Meal;***

- A balanced meal is a meal that contains food from each of the food groups in equal proportions**.**

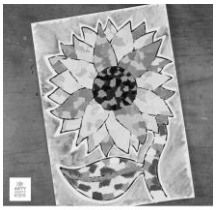

# 2.3.1 TWO DIMENSIONAL CRAFTS

## ***2.3.1.1 Collage, Mosaic and Montage***

1. Collage;

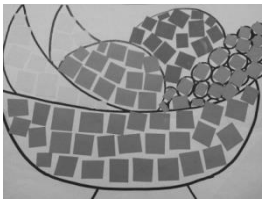

- This is sticking different kinds of materials or objects onto a flat surface like paper or cardboard.
- Materials may overlap.
- Materials like grass, branches, paper, leaves, egg shells and seeds can be used.

2. Mosaic;

- This is sticking small pieces of materials onto a surface like paper or cement.
- The pieces of materials have to be of the same **size, shape** and **type** and should not overlap
- Materials like paper, small stones, seeds, vegetable peels can be used.

3. Montage;

- This is building up of a picture by sticking pieces of other pictures such as photographs, pictures from magazines and newspapers on a flat surface like paper.
- Materials like photographs, old paintings or drawings can be used.

# 2.4 MEDIA

- Communication is the passing on of information or messages between two or more people.

**Visual Communication;**

- It is the passing of ideas and messages in form that can be read or looked at.
- It is achieved by designing and drawing visual symbols to pass or convey a message.

***2.4.1.1 Forms of Visual Communication;***

- Signs
- Drawings
- Photography
- Art
- Illustration
- Graphic Design
- Colour

***2.4.1.2 Advantages and Disadvantages of Visual Communication***

1. ***Advantages;***

- Messages can be easily understood because only few words are used
- People's attention can be easily captured by drawings, colour and photographs used.
- Contains only what is important (brief and straight to the point)

2. ***Disadvantages;***

- Because of few words used, it may be difficult for some people to understand.
- If not properly done, it can confuse people.
- The visually impaired will not be able to read, see and make use of the message.

***2.4.1.3 Use of Visual Communication;***

*Visual Communication can be used to:*

- Entertain
- Give warnings
- Give instructions

# 4.1.4BUSINESS

***4.1.4.1 What is Business?***

- A business is a process that uses resources to create a product or service which is sold to the market to make profit.
- A business makes money by providing goods and services that people need.

***4.1.4.2 Analysis Of Different Goods And Services Supplied By Businesses***

- ***Goods;***
  They are things that you can see and touch like cars, food, house, school uniform, etc.

- ***Services***They are things that you cannot see or touch like health care in clinics and hospitals and education at schools.

- Some businesses can provide both goods and services at the same time. E.g. A furniture shop can sell a television to a customer, give information on how to operate that television and transport it to the customer's home.

#### *4.1.4.3 Ways In Which Business Identify Needs And Wants Of Consumers*

- Businesses produce goods and provide services that they know people will use.
- Businesses carry out market research to identify the needs and wants of people.
- A market research is a process in which a business goes through to find out what people want and need

*A market research will give important information such as*:
- ✓ The type of needs and wants of people.
- ✓ How they want the needs and wants to be met.
- ✓ How many people are prepared to buy and use the goods and services
- ✓ The general satisfaction or dissatisfaction consumers feel about the goods and services

#### *4.1.4.4 The Part Played By Business In Satisfying The Needs And Wants*

- Business satisfy the needs and wants of people by producing and making the goods and services available to the people
- Businesses get involved in foreign trade to satisfy the needs and wants of people. ( Foreign trade is exchange of goods and services between countries, E.g. Botswana and South Africa)
- Businesses make sure that they import the goods that are not produced locally and make them available to the consumers. (imports are things that we get from other countries and exports are those that we send to other countries)

# 3.2 CREATIVE DANCE

#### *3.2.1.1 Identify Dance Elements As Level, Shape Direction And Pathways;*

- Dance is the way you move your body and the relationship between your body's movement and the beat of the song.

*Dance elements include;*

1. ***Levels;***
   There are three (3) levels in dance which are;

- ***Level 1 or Low Level;*** this is when the body is on the ground in a horizontal way.
- ***Level 2 or Medium Level;*** this is when somebody is dancing resembling a person sitting on a chair**.**
- ***Level 3 or High Level;*** when someone dances in a standing position.

2. ***Shapes;***

- When a person is dancing, they can form many different shapes like circle, square, wavy lines, triangle, etc

3. ***Directions:***

- When someone is dancing, they can move in different directions like forward, sideways, backwards, zigzag and circular directions

4. ***Pathways;***

- Pathways are patterns created when dancing. The patterns may resemble shapes like diamond, square, circle and triangle.

***3.2.1.2 BODY MOVEMENTS***

There are two types of body movement patterns which are;

1. ***Body Awareness;***

- This is how flexible your body is.
- The dancer must be able to do things like balancing, which demands that the different body parts support or receive the weight
- Different body parts can be involved in the movements and be used as body support.

2. ***Space awareness;***

- This is where the body can move and it is divided into the following;
- ***Personal Space;*** it is the limited area that an individual dancer can use. The dancer may use the space of about $1m^{2.}$
- ***General Space;*** it is the total space that is available to all dancers. They may use the school hall.

***3.2.2.1 Choreography;***

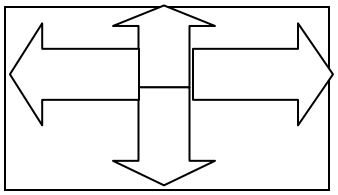

- It is choosing, arranging and combining movements to create a dance form. For example, choosing different levels, pathways, shapes, directions and putting them in a desired way to suit an individual.

***3.2.2.2 Space Usage;***

***Personal Space;***

- For one to be able to use space appropriately, he or she must plan his or her movements in such a way that they will fit in the space provided.

  E. g. The figure below shows how one can use the space provided

***General Space;***

- This is a big space for many dancers to use.
- Dancers have to be careful not to collide with each other when dancing.
- Using the space properly is very important because it reduces the risk of injuring each other.
- It also spares the space for other activities apart from dancing.

***3.2.2.3 Cooperative and Social Skills;***

When working towards a common goal, it is important to consider the following skills;

1. ***Cooperation;***
   - To come up with a good piece of dance, you need to work together, listen and respect each other and be fair.

2. ***Tolerance;***
   - As a team, you need to accept that each member is different but it is important to respect and accept different ideas from other members of the team.

3. ***Group Organisation;***
   - Keeping order is very important.
   - Before the dance, dancers must be in a particular order, with each member knowing what to do and when to do it
   - Each member of the team must have their task to perform.

4. ***Team Work;***
   - Good team work makes the dance beautiful and interesting to watch.
   - Each member must stick to their task and feel part of the team and work together.

***3.2.2.4 Patterns in Dance;***

- When dancing, performers can form different patterns.
- Patterns may differ according to the available space and the desire of the dancers. Examples of patterns may be zigzag, circular, triangular etc.

***3.2.2.6 Role Of Dance In The Community;***

Dance has different purposes which include;

- Promotion of culture.
- Entertainment
- Showing ways of life, E. g. Basarwa dance with bows and arrows which indicate hunting
- Communication of messages. E. g. in promoting HIV/AIDS awareness message, dancers will dance as if they are teaching abstinence.

***3.2.2.7 Evaluation***

- Evaluation is finding out whether the dance was a good or bad one.
- When evaluating, one has to check if dance elements were properly fitted into the dance piece.

# 3.2.3 TRADITIONAL DANCE

- Traditional Dance is a dance that originates from a set tribe.

***3.2.3.1 , 3.2.3.2 and 3.2.3.4 Traditional Dances in Botswana***

The following table shows some of the traditional dances found in Botswana.

| .DANCE | TRIBE | SIGNIFICANCE |
|---|---|---|
| 1. Tsutsube | Basarwa | To show happiness after a clan had a kill from hunting. |
| 2. Setapa | Bangwaketse | To show happiness after a good harvest.. |
| 3. Phathisi | Bakwena | To show happiness after a good harvest |
| 4. Hosana | Bakalaka | Done when there is no rain to beg Ngwale, Gods of Bakalaka, for rain. |

***3.2.3.5 Difference between Dance Patterns;***

1. ***Phathisi;***

- It is done by hitting legs together and clapping hands.
- Legs are cushioned with some cloths or any soft material.
- Hitting of legs produce a certain sound

2. ***Tsutsube;***

- The dancer changes his/her legs or feet simultaneously paying more attention to the rhythm of the song.

3. ***Setapa;***

- The dance is done with every part of the body including hands and legs
- One combines or coordinates those parts with every style or set of movements he/she knows.

# 3.3 GYMNASTICS MOVEMENTS

- Gymnastics is physical exercises done indoors, often using equipment such as ribbons, ropes and bars.
- They involve some movements and skills.

***3.3.1.1 Gymnastic Movements;***

**1. Travelling;** moving from one place to another by rolling, (backward or forward roll)
**2. Balancing;** achieving stillness while supporting your weight. One can balance by head stand, hand stand and stork.
**3. Rotating;** turning, twisting or rolling.

***3.3.1.3 Linking or Joining Movements;***

- The movements are used to give a gymnastic piece of work a flow.
- The movements join or link the skills in a sequence in order to avoid breaking or pausing
- They include;

**1. Leaps;**

- A leap is a long jump or when someone jumps a long way.
  For example, children play a game called leap-frog where one bends over and another bone jumps over him/her.

**2. Turns;**

- A turn is an act of moving around a fixed point or changing positions so that you are facing a different direction.
  For example, turn left or right.

**3. Jumps;**

- Jumping is moving quickly from the ground by pushing yourself up with legs and feet.
  For example, jumping into the air or over a chair.

**3.3.1.5** ***Balance And Tension;***

***1. Balance;***

- Balancing is being in a steady position in which body weight is evenly spread.
- For counter balance with your partner, stand up and push each other face-to-face against the palms.

**2. Tension;**

- It is how tightly something is stretched.
- For counter tension, you hold each other by the palms, from the central position lean back and use feet as a fixed position.
- Make sure not to leave your partner to avoid injuries.

***3.3.1.6. Rhythmic Movements;***

- A rhythmic movement is a pattern of regular repeated movement. For example, in a circle, you may move forward three steps back and four steps forward and the repeat.
- The pattern of movement can be done using balls, ribbons or hula-hoops

***3.3.1.7. Canon and Unison*;**

**1. Canon;**

- It is having overlapping movements at different intervals by more than one performer.
- The same movements are done but at different times.
- In gymnastics, canon can be done using a variety of skills like forward roll backward roll and cartwheel.

**2. Unison;**

- It is doing the same thing at the same time. For example during BDF or Police Day, the officers march at the same speed in agreement with the music
- Unison creates beauty and adds value to gymnastics.

***3.3.1.9. Evaluating Performance;***

For one to check if they are doing the right thing, the following should be taken into consideration;

- **Safety;** whether performers land properly or rolling is done accordingly and other factors that can pose a threat to the performers.
- **Flexibility;** is the person doing the set skills with the amount of flexibility required.
- **Speed;** some skills need to be done fast. E, g forward roll must be done at a certain speed.
