SCIENCE

TERM 3 – 2016

STANDARD 5

DURATION: 1 HOUR

MARK: 50

NAME: .....

1. What is universe?
   A. Everything that exists.
   B. Everything that moves.
   C. Everything that has an ending.
   D. Everything that is visible.

2. Which of the following changes occur in both girls and boys at puberty?
   A. Hair grows on the chin.
   B. Skin becomes oily and develops some pimples.
   C. Menstruation begins.
   D. Voices become deep.

3. Which of the following are natural sources of light?
   A. Fire flies and lightening.
   B. Sun and moon.
   C. Electric light and lightening.
   D. Candle and tungsten light.

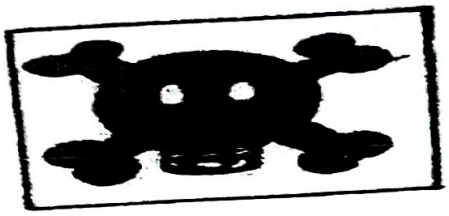

4. All the following are components of air except
   A. Nitrogen
   B. Potassium
   C. Carbon dioxide
   D. Water vapour

5. What is puberty?
   A. When they become capable of reproduction.
   B. When they start to have sexual partners.
   C. When they are in their teens.
   D. When they grow taller

6. How can water be conserved?
   A. Ploughing drought resistant plants.
   B. Watering plants during the day.
   C. Brushing teeth under a running tap.
   D. Use water for only one purpose.

7. Why is photosynthesis important to both plants and animals?
   A. It provides carbon dioxide for animals to breath.
   B. It reduces the amount of carbon dioxide from the air making it possible for animals to breathe healthy air.
   C. It helps animals to prepare their own food without depending on plants.
   D. It helps animals to be self sufficient.

8. What is the meaning of the symbol drawn below

   A. Flammable
   B. Poison
   C. Electric shock
   D. Danger

USE THE INFORMATION BELOW TO ANSWER QUESTION 9

Teko was in the kitchen preparing food for her family. She wore an apron, gloves and the scarf. She presented herself very neat and clean before she served her dishes.

9. What practice was Teko trying show?
   A. Proper storing of food.
   B. Hygiene practice for the kitchen.
   C. Proper handling of food.
   D. Proper serving of food.

10. Which of the following is a non-luminous object?
   A. sun
   B. moon
   C. torch
   D. fireflies

11. Mrs. Dintwe cooked food for her family. She forgot to add salt to the meat she cooked. Why is there a need for salt to be added in the food?

A. It adds taste to the food.
B. It fries food.
C. It produces gas that raises dough.
D. It adds a sweeter taste to the food.

12. Meat, fish and beans belong to which food group?

A. Energy giving food.
B. Body building food.
C. Protective food.
D. Supplementary.

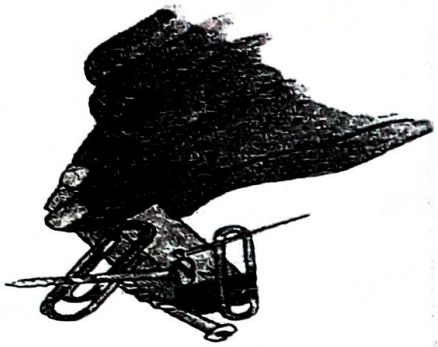

13. What effect has caused the wiring to appear long and hanging during the day?

A. Electricity
B. Heat
C. Water
D. Gas

14. A farmer painted his spade with paint. What is the farmer preventing?

A. Oiling.
B. Rusting.
C. Rainfall.
D. Wind.

USE THE PICTURE BELOW TO ANSWER QUESTION 15.

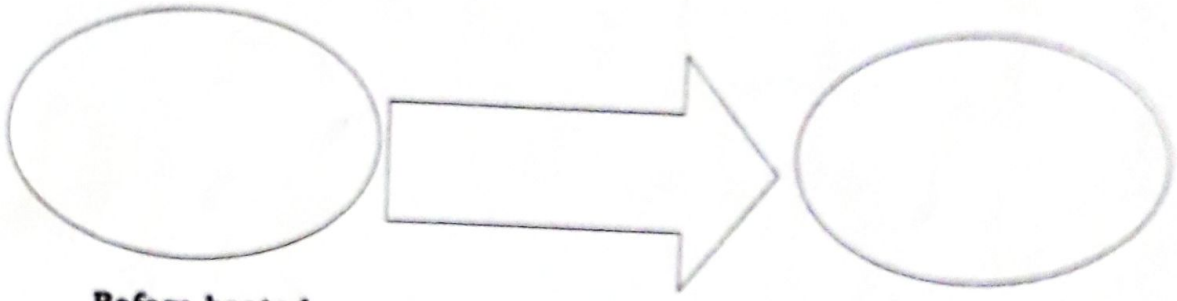

15. From the picture above, what property of magnet is the person demonstrating?

A. Magnets have poles.
B. Magnets attract metals.
C. Magnets show direction.
D. Magnets exert force

16. Which of the following is **not** a body system?

A. Solar system.
B. Digestive system.
C. Circulatory system.
D. Excretory system.

THE DIAGRAM BELOW SHOWS THE SIZE OF A BALLOON CONTAINING AIR BEFORE IT WAS HEATED AND ITS SIZE AFTER IT WAS HEATED. USE IT TO ANSWER QUESTION 17.

Before heated **After heated**

17. Which property of air did **NOT** change during the heating process?
    A. The space between air particles.
    B. The speed of air particles.
    C. The temperature of air.
    D. The mass of air

18. The following are sources of sound **except** _____
    A. Car hooter.
    B. Trumpet.
    C. Stones.
    D. Piano.

19. What is the meaning of the symbol below?

    A. Poison
    B. Flammable
    C. Electricity
    D. Danger

20. Which planet is furthest from the earth?
    A. Mars.
    B. Pluto.
    C. Jupiter.
    D. Mercury.

21. Which of the following is **NOT** a class of vertebrates?
A. Arachnids.
B. Mammals.
C. Reptiles.
D. Amphibians.

Neo got burnt by fire and his brother poured water onto her to put out fire from her.

22. Which is the correct way of putting out fire from a person burning?
A. Wrap her with a blanket.
B. Pour sand on her.
C. Use fire extinguisher.
D. Switch of electric circuit.

23. Which of the following are communicable diseases?
A. Diabetes, syphilis.
B. Malaria, whooping cough.
C. TB, measles.
D. Cancer, malaria.

A student rubbed a pen on his head then he used a pen to pick up small pieces of paper.

24. Which type of electrical charge was produced?
A. Magnetic charge.
B. Magnetic electricity.
C. Current electricity.
D. Static electricity.

25. Why is the earth the only planet in the solar system where life can exist?
A. There are lots of gases and its dusty.
B. There is suitable temperature, oxygen, water and carbon dioxide.
C. There is suitable temperature and its dusty.
D. There is no suitable temperature and air.

26. What is a disease?

A. An infection that makes the human body unwell.
B. An organism that causes germs which makes the body weak, painful or tired.
C. An inflation in the human stomach that causes a burning.
D. A discomfort or pain that causes the body temperature to rise.

USE THE INFORMATION BELOW TO ANSWER QUESTION 27.

Mpho, a boy in standard 5 class enjoys eating porridge for breakfast, fat cakes and chips for lunch and a pie for supper every day.

27. Which food group does Mpho like eating mostly?

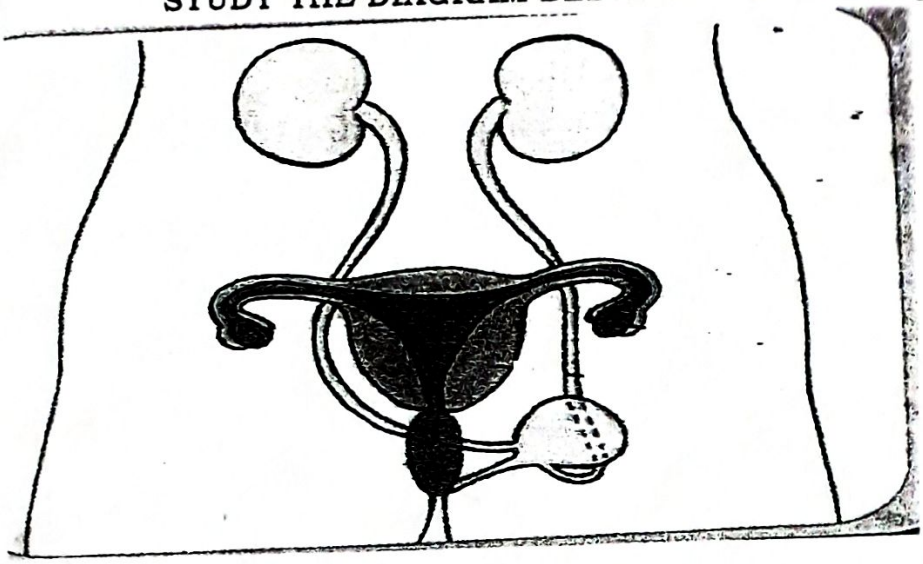

A. Body Building Food
B. Protective Food
C. Energy-Giving Food
D. Supplementary Food

28. Why do passengers put on safety belt?
A. To avoid injuries during accident
B. To increase road accidents
C. To reduce road accidents.
D. To avoid road accidents

29. Menstruation is described as _____

A. The release of blood and tissues from the womb every month.
B. The release of blood and tissues from the nose of a human body.
C. The time when a woman stops menstruation permanently.
D. The time when a child starts changing to an adult.

STUDY THE DIAGRAM BELOW AND ANSWER QUESTION 30

30. What system of the body is drawn above?

A. Reproductive
B. Circulatory
C. Excretory system
D. Respiratory system

31.Which statement best describes puberty?

A. The time when a woman become pregnant.
B. The time when the body becomes big.
C. The time when a woman stops menstruation permanently.
D. The time when both girls and boys bodies change from childhood to adulthood.

USE THE STATEMENT BELOW TO ANSWER QUESTION 32

A student in standard five carried out an experiment with iron fillings and a bar magnet as shown below.

32. Which property of magnets was the student investigating?

A. Magnets are strongest at their poles.
B. Magnets attract some materials.
C. Magnets show direction.
D. Magnets exert a force.

USE THE INFORMATION BELOW TO ANSWER QUESTION 33.

Percy went into a store to buy an apple after a long walk from school. He washed it before eating it.

33. What practice was Percy showing?

A. Proper use of money.
B. Hygienic practice of food.
C. Proper serving of food.
D. Good healthy exercise of the body.

The gas cylinder in a house caught fire.

34. Which one is the correct way to put out that fire?

A. Pour water
B. Pour sand
C. Wrap a blanket around fire
D. Use fire extinguisher

35. In which list of diseases are correctly classified as communicable and Non-communicable?

COMMUNICABLE DISEASES	NON-COMMUNICABLE DISEASES
A. Malaria	Tuberculosis
B. Measles	Whooping cough
C. Measles	Bilhazia
D. Cancer	HIV/AIDS

USE THE INFORMATION BELOW TO ANSWER QUESTION 36.

A young boy was feeling very cold at night before going to bed. His mother prepared fire in the Mbaola system to warn up and put it in a house with window closed.

36. From the above information, why was it not safe to sit in a house with its windows closed?

A. The boy could suffocate easily.
B. Fire will set the house into flames.
C. The boy could burn his clothes.
D. The boy will sleep tight without difficulty

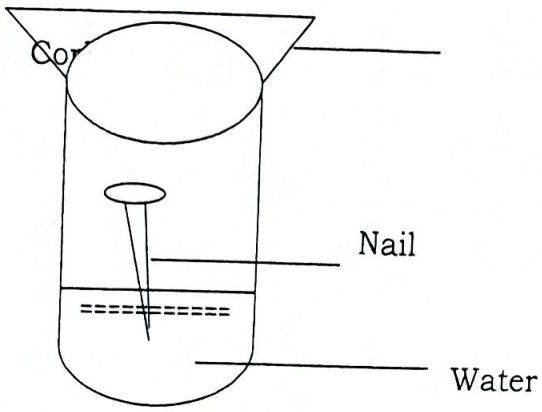

37. Which household/chemicals are correctly classified as solids, liquids and gases?

	SOLIDS	LIQUIDS	GASES
A	Salt	Mosquito coil	Vim
B	Vinegar	Salt	Baking powder
C	Spray perfume	Liquid soap	Vinegar
D	Salt	Oil	Doom

38. Which of the following is a source of chemical energy?

A. Coal
B. Sun
C. Water
D. Wind

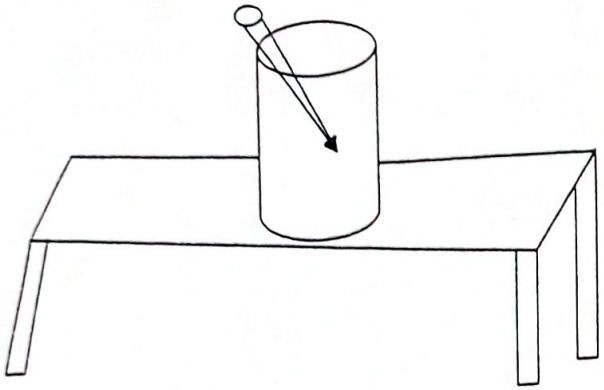

USE THE DIAGRAM BELOW TO ANSWER QUESTION 39 ON RUSTING.

39. How can they prevent the nail from rusting?

A. Remove the cork to let the container open.
B. Add more water to cover the nail.
C. Cover the nail in oil or paint.
D. Remove the water and close the container tightly

USE THE DIAGRAM BELOW TO ANSWER QUESTION 35 ON THE EFFECTS OF HEAT ON TEMPERATURE OF THE LIQUID.

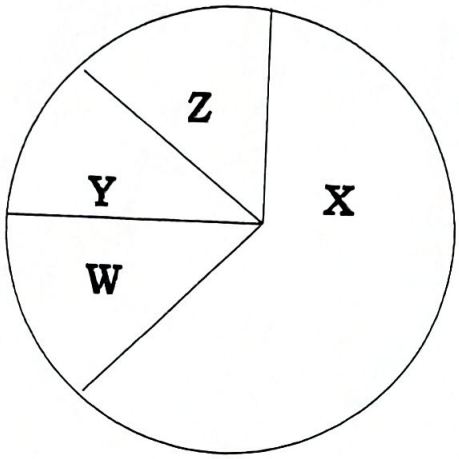

40. What conclusion can be given about the experiment above?

A. When water gains heat energy its temperature increases.
B. When water gains heat energy its temperature decreases.
C. When water gains heat energy expand.
D. When water gains heat energy its temperature does not change.

41. The following sources of light are correctly classified as natural and artificial **EXCEPT** _____.

Natural	Artificial
A. Fluorescent tube	Candle
B. Fire flies	Paraffin lamb
C. Sun	Lightening
D. Candle	Moon and stars

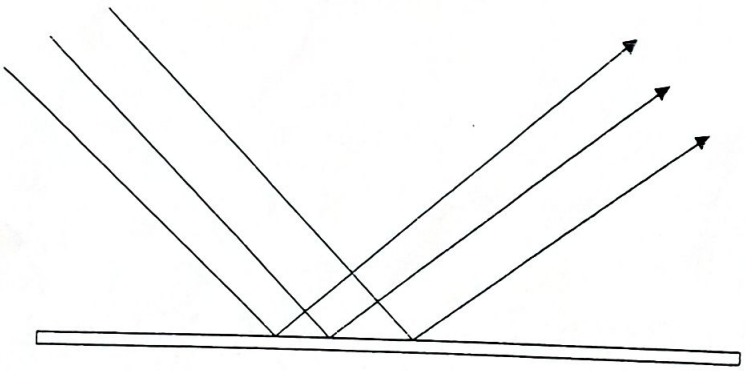

USE THE DIAGRAM BELOW TO ANSWER 42 WHICH SHOWS THE PROPORTION OF GASES PRESENTIN THE AIR.

42. Which gas is represented by the letter X?

A. Oxygen
B. Nitrogen
C. Water vapour
D. Carbon dioxide

USE THE DIAGRAM BELOW TO ANSWER QUESTION 39

43. Which statement about light rays from smooth surface is true?

A. Light rays from a smooth surface are reflected and scatter to different directions.
B. Light rays from smooth surface reduce the rays of light when falling on them.
C. Light rays from a smooth surface are reflected back in the same way.
D. Light rays from a smooth surface are absorbed most of time.

44. Which statement best explains a system?

A. A set of different organs that work together for the same purpose.
B. An organ that breaks down food into simple nutrients.
C. An illness that causes the body to stop working.
D. A special period of growth and change in humans.

45. How can one best conserve water?

A. By brushing teeth under a running tap.
B. Watering plants on a hot sunny day.
C. Washing a car using a hosepipe.
D. Fixing leaking taps and pipes.

46. Which physical property of metals is correctly matched with its use?

	PHYSICAL PROPERTY	**USE**
A.	Shiny	To make jewellery
B.	Heavy	To make aeroplane bodies
C.	Brittle	To make railway lines
D.	Strong	To make utensils

47. What conclusion can one give about the experiment above when two materials are clipped between the clips at different times?

A. Paper clip is a conductor.
B. Pencil is a conductor.
C. Both pencil and paper clip are insulators.
D. Paper clip is an insulator.

48. The following are the advantages of electromagnets over a permanent magnet **EXCEPT** _____

A. They can be made stronger or weaker.
B. When they become older they lose strength.
C. They can be switched off.
D. Electromagnets are lighter.
